RICH RED HYBRID TEA ROSE Madame Eugene Marlitt

(See illustration in colors on front cover page)

Vigorous Hardy Prolific
Rich in Fragrance Excellent Every Way

After thoroughly testing this rose for three years in our trial grounds here, we unhesitatingly pronounce it one of the **most fragrant, vigorous growing, abundant blooming** roses recently introduced. The illustration made from a photograph and shown in colors on our front cover page does not do the rose justice. The flowers are beautiful—they are very large, full and double. The color is a rich carmine red which does not soon fade out but continues bright a long time. The rose is so adaptable and responsive and its blossoms are produced in such abundance all Summer and Fall that we predict it will make firm friends wherever it is planted. Perfectly hardy here.

CONARD & JONES.

Gentlemen:—I wish to express to you my gratification at the size and vigor of the roses I received from you last year. They were the *best plants I have had in thirty years of rose-growing*. I am sincerely yours, MRS. JOHN L. KENNEDY.

Price 25c. each, \$2.50 per doz.; postpaid. 2-year size, 50c. each, \$4.50 per doz. 3-year size, 75c. each, \$6.00 per doz., by express.

QUALITY

The wise purchaser in selecting what he wishes to buy, considers the **price** of an article **ONLY AS A GUIDE**. It is **Quality** offered, which he needs most to know, especially when buying Roses.

Roses bought at bargain counters often prove to be very expensive before you are done with them. The question which mainly concerns a wise buyer of Roses is not "What do these Roses cost me?" but "What will these Roses do for me?" Heretofore anyone who bought Roses had to get them on risk, it was a gamble—sometimes they bloomed and sometimes not.

After a long experience in growing Roses for amateurs we have entirely changed that and offer you

A New Way to Buy Roses

by which that risk is entirely eliminated. The experience of almost a half century's earnest effort in doing one thing well has taught us how to grow Roses which are **so sure to bloom that we can guarantee them**. We want you to know that when you buy from us you can depend upon getting your money's worth or your money back.

And we believe that no stronger proof of the first-class result-giving quality of our stock could be offered or asked for than a guarantee of this kind.

We were the first, and we believe we are the only ones who sell Roses with such a guarantee, and we ask our friends to remember that it is not the guarantee which makes the Roses good, **but it is the quality of the plants which enables us to make the guarantee.**

Your Success With Our Roses

is a matter in which we are mightily interested. Good stock is very necessary to begin with, but that is not all—**Choosing the right kinds of Roses, and giving them the proper care after you get them** are quite as important. Some firms say: "When we deliver them to you in good condition, our responsibility ends." We go further and guarantee results:

1st. Because we love flowers and we want you to enjoy them also (entirely aside from any thought of commercialism on the part of either of us).

2d. Because we know that our success is dependent upon your success. Therefore we endeavor to do everything reasonably within our power to help you succeed with the plants we send you.

A BIT OF HISTORY

Since 1869 the entire business careers of our Vice-President (Antoine Wintzer) and of our late President (Alfred F. Conard) were devoted to the Growing of Roses. They were pioneers in this industry and as President and Superintendent of their company, were the first to grow, sell and ship "own roots" roses on a large scale. In the intervening years since then millions upon millions of sturdy young rose plants have been sent out from West Grove to all parts of our country and it was under the direct supervision of Mr. Wintzer and Mr. Conard that most of these Roses were grown and sold. Our customers get full advantage of this splendid experience in many ways, but especially by the fact that methods thus learned go to produce for you what we believe to be **the Best Roses that can be Grown.**

Since writing our last Annual Catalog we have been called upon to loose by death Alfred F. Conard who was the honored President and founder of our firm. **It was he who wrote and compiled the first Rose Catalog in America.** He was a man most highly esteemed and respected by a wide circle of friends and acquaintances and his memory will ever be an incentive to higher standards.

If You wish us to Prepay the Charges on 2-Year Old Plants

which are offered at a price that does not include cost of delivery, we will do so and send them free to any postoffice or express office in U. S. A., if you will add to your order the following amounts to help cover charges:

10	CENTS FOR EACH PLANT
50	" FIRST 6 PLANTS
75	" " 12 " and
5	" per plant in all cases where more than 12 2-year old plants are to be sent in the same shipment.

Free by Mail All the items in our catalogue which are priced "postpaid," will be delivered free by mail. Even to most distant countries, such as India, South Africa and Asia Minor, we ship this way with marked success.

ORDERS BY EXPRESS

Two-year old roses, large size shrubbery, fruit trees, etc., are too large to mail and must be sent by express. We recommend that customers instruct us to ship smaller sized plants also by express, when in our judgment it is best to do so. We can send larger plants this way and can leave most of the earth on roots, which is of course much better for our customers. **Express Charges must be paid by the purchaser**, unless otherwise agreed. (See note foot of this page). But we are careful to pack as light as safety of the plants will permit and add as many extras as we can afford to help cover charges, and since the expressage on plants, bulbs, etc., is now 20% less than regular merchandise rates, the cost of sending goods in this way, even to distant points, is quite reasonable.

The Cost of Express Charges

you can estimate quite closely with the following schedule. Use the rate named for the town nearest you and count the weight of 2-year old plants when packed ready to express about as follows: 12 plants—15 lbs.; 25 plants—30 lbs.; 125 plants—100 lbs.; plants 1-year old 20 to 30 lbs. per 100 plants.

West of the Rocky Mountains, the express rate on plants is from 10c. to 12c. per lb.; but charges when pre-paid are only 8c. per lb.; To save themselves unnecessary expense therefore, we recommend customers living in that section to remit with their order sufficient money to prepay express. If too much be sent we will return the difference at once. (See foot note).

Express To Foreign Countries

By express we can ship goods to any part of the world if the party ordering will name some one in New York to receive and forward the goods and prepay Ocean Freight.

Further information and rates will be cheerfully furnished on application. See also Note on Page 7.

Our Fall Catalogue of imported bulbs, plants and seeds for Fall planting and Winter bloom will be ready about September 1st, and sent to all our patrons of this year without request; to others FREE on application. If not received promptly, a postal card will bring it.

THE CONARD & JONES COMPANY, Rose and Flower Growers, West Grove, Pa.

We Guarantee Roses not as do other firms, only to reach you in good condition, but we go further and guarantee them to *live, grow, and bloom*. It is the **QUALITY** of our Roses alone which makes this guarantee possible.

OUR GUARANTEE

WE GUARANTEE ALL C. & J. ROSES TO GROW AND ALSO TO BLOOM AS FOLLOWS:

All Roses in our Catalog are guaranteed to bloom at the first natural blooming period after they have had a chance to become established, which in some cases will be the first season, but which in other cases may not be until the second season,—so that without reservation all C. & J. Roses are guaranteed to bloom during or before the second season (*providing* they are not allowed to become eaten up with insects or Winter killed), and neither of these calamities need happen to your Roses if you take the usual precautions as suggested on pages 8 and 9, and as long as you select from the classes recommended below as the most suitable for your locality.

We Offer a Greater GUARANTEE for the Roses on pages 32 and 33

Our guarantee simply indicates more forcibly than any other way we have at command not only that **C. & J. Roses** are "**The Best Roses in America**," but rather also announces in an unmistakable manner our already established policy of **Thorough Satisfaction for Every Customer**, and that is exactly what our guarantee means—that if you get the **right C. & J. Roses** and then do your part, you can depend upon good results, and if by chance any of our Roses should not come up to our guar-

antee, we stand ever ready to send you more to make good any such loss, in full.

Of course much of their success depends upon the care you give them; we tell you how (pages 8 and 9), and then *trust* you that you will look after them.

Every intelligent Rose lover soon learns how well it pays to give her Roses plenty of nourishment and care.

KEEP OUR CATALOG, follow directions, and you'll not fail.

"We never consider a transaction settled until **YOU** are **FULLY SATISFIED**"

How to Select Your Roses

For the Latitude of Philadelphia, or any temperate zone where the thermometer usually does not get below zero.

All the Roses on pages 10 to 51, except climbers on page 37. Kinds on pages 10 to 37 will be the better for careful Winter protection. (See page 9.) In this climate you might as well protect all your Roses while you are doing it. It will not hurt the hardiest, and even they will grow the better for it.

For Colder Climates, where the Winters are long and severe and where it will pay you to protect all your roses thoroughly.

All Roses on pages 38 to 49 inclusive, especially the Rugosas, Memorial and Moss Roses. Also the Hybrid Perpetuals and miscellaneous Roses on page 12. Only the hardiest of those offered on pages 10 to 35, including such kinds as:
 Clotilde Soupert, Champion of the World, Etoile de France,
 Gruss an Teplitz, Mad. E. Marlitt, Kaiserin Augusta Victoria,
 Baby Rambler, Beauty of Rosemawr, and other Hybrid Teas. These named
 Helen Gould, Etoile de Lyon, should have most careful protection.

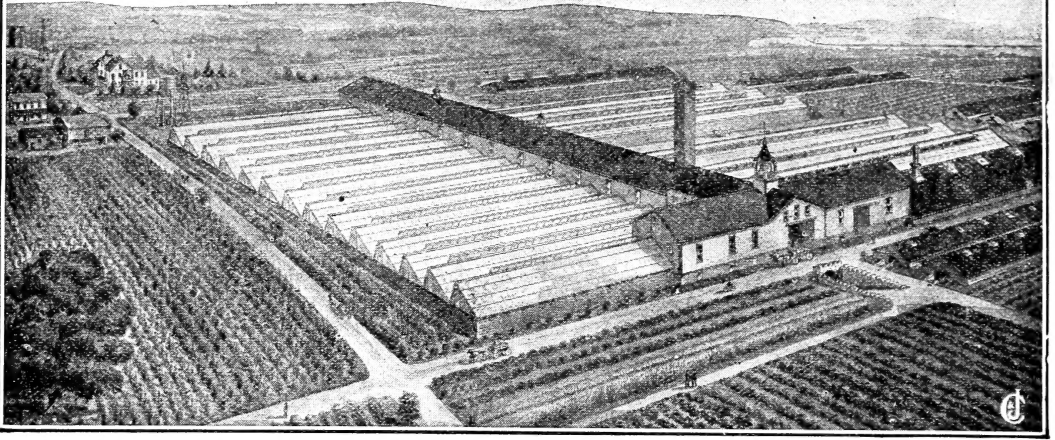

For Warmer Climates, such as the South and the Pacific slope states where the Winters are mild and frost is rare.

All the Roses on pages 10 to 37 inclusive. (Note especially page 37.) The Roses on pages 38 to 49 will also thrive in the South, but are less desirable except for "special purpose" work. (See next page.)

We are always glad to have our friends report their success with our plants

 GROWERS OF THE BEST ROSES IN AMERICA.

NOTE—Intending purchasers and others are cordially invited to visit our nurseries and inspect our stock. They will always be welcome. Our plant is thoroughly equipped with all the modern appliances for growing Roses of the very best quality.

HOW TO HAVE **SUCCESS WITH ROSES**

IN GROWING ROSES, above all things, **START RIGHT**, get good plants, they are the most economical in the long run. Also get varieties suited to your locality; the best Roses for Maine are not necessarily the best for California. For further information on this point please see pages 6 and 7.

Making Ready Plan ahead—it always pays—we book thousands of orders during January, February and March, to be shipped at planting time. The owners of fine rose gardens order early. You too will find that it pays.

When to Plant Dormant Roses may be planted just as early in the Spring as the ground can be properly worked, or in the Fall. Pot grown roses plant as soon as danger from hard frost is past and all through the planting season. April, May and June are the best planting months for this country. (We ship growing plants, not dormant stock, except where otherwise noted.)

Where to Plant Roses will do well in any good garden soil and prefer a sheltered, sunny location. Avoid thickly shaded places and where they will be interfered with by the roots of large trees. Bush Roses may be best arranged together in beds or borders. The size and shape of a bed, wherever planted, should be made to fit the situation. Plant, as a rule, about eighteen inches apart; for example, one dozen roses will nicely fill a bed eight feet long by three feet wide. The Hybrid Perpetuals, Rugosas etc., however, should be at least two feet apart. Long border beds are very popular, and it is well to remember that one can cultivate and pluck the flowers more conveniently if the bed is not more than three to four feet wide.

Prepare the Ground By digging and working as thoroughly as possible—the same as for any other plants. Old, well rotted sods with some clay makes the best soil and if the ground is in fairly good condition no extra manuring or sodding is necessary, but if needed, cow manure is considered the best or any reliable fertilizer may be used if more convenient, but whatever is used should be dug in and thoroughly mixed with the soil or

else applied on the surface as a top dressing after the plants are set. **Never put fresh manure or any strong fertilizer in direct contact with the roots** as it is injurious and may kill the plants or hinder their growth.

Treatment when Received If plants come by mail with moss on the roots and should be, by chance, wilted or dry when received, soak them thoroughly, with all the wrappings on, an hour or so in blood warm water, this will be found to revive them greatly. If they seem soft and tender and have some new growth, clip off at least half of it before planting, as the roots will not be able to supply much nourishment until they become established in their new home. Also cut off with a sharp knife any broken or bruised roots, so that they may start clean and fresh.

How to Plant If possible, choose a damp, cloudy day for planting, or it may be done early in the morning or evening, so as to avoid the hot mid-day sun. **Do not allow the roots to become dry** as this is almost certain death to them. **The soil should be mellow and crumbly and the roots thoroughly soaked in water or dipped in thin mud before planting** so that the earth will adhere to them at once. When the ground is ready, make holes large enough to admit the plant with the roots spread out in their natural position and a little bit deeper than it has grown, then cover the roots carefully with fine moist earth, taking care to work it well in under and around the roots and **then press firmly down with the hands** so as to force out the air and **bring the roots in actual contact with the soil**. This is very important as otherwise they are liable to dry out. Then pour in enough water to wet the roots thoroughly and add more earth to fill the hole, rounding full and tread firmly down with the feet.

We suggest that you **KEEP THIS CATALOG AND THESE DIRECTIONS FOR REFERENCE**

HOW TO HAVE SUCCESS WITH ROSES

(Continued)

WE SUGGEST THAT YOU KEEP THIS CATALOG FOR REFERENCE

In Planting Two and Three Year Old Roses

The same general principles apply as above. These fine large roses almost invariably come by express with a ball of earth adhering to the roots. It is not necessary to remove this entirely, but when planting where they are to remain, this ball of earth should be dampened first and then loosened up so that the roots, when planted, can readily come in contact with new, good soil and thus be encouraged to make fresh, strong growth. Dormant roses are shipped without any soil on the roots. In the main, therefore, follow the same general rules as for the one-year roses, but place the roses a little further apart, say about two feet.

If Not Ready to Plant

Immediately when received they should be "heeled in" by placing them in a slanting position in a shallow trench and covering the roots thoroughly halfway up the stems with fine soft earth, well pressed down, to keep them from drying out, and if roots seem at all dry, pour a pail of water on them in the trench; in this way they will keep perfectly for several days, or, for a few days, they may be opened and kept upright in a cellar or other suitable place, if not allowed to get dry, but they should be planted where they are to remain with as little delay as possible.

If Weather is Hot and Dry

Water thoroughly occasionally, evening is the best time, but if ground is kept mellow and well stirred, very little water is required unless in unusually dry times. Stirring the earth with a hoe or rake every day is better than watering, as it serves to bring up moisture from below and helps to keep the ground clear of weeds and grass, which is very important. Let them bloom as soon and as much as they will, but be sure to keep the flowers picked off every day before they wither or fade, for if allowed to dry up on the bush, they weaken its growth—and fewer blooms will be the result. The more vigorous your plants grow the more they will bloom, and the finer and sweeter the flowers will be.

Winter Protection

Although we carefully explain in the introduction to each class whether the roses in that class are hardy or not, the safest way is to protect all your roses, for it will do no harm to the hardest and where manure is used for a covering it also serves the purpose of a fertilizer.

After the leaves have fallen and before very hard frost in the Fall, give the beds a covering of manure, straw, cedar boughs, corn fodder, leaves or street sweepings; enough to keep the roots from freezing, but still not smother the plants. In very cold localities it sometimes pays to wrap the entire bushes in straw or bend them down to the ground and fasten them to stakes driven in for the purpose, and then cover as above.

In the Spring uncover gradually before the new growth starts, and cut off all dead looking wood. If necessary, Own Root Roses may be trimmed quite to the ground; they will soon spring up and bloom again true to name. Budded plants under the same circumstances would be lost, this is why Own Root Roses are best when they can be obtained.

But the matter of protection is not such a serious problem these days when good new rose plants can be obtained at a very low price. Many people feel that the blossoms produced the first season are worth many times the cost of the plants and so buy new ones each year.

Pruning Roses

Roses differ so in habit of growth that Pruning becomes much a matter of judgment. Spring is the best time, before new growth starts. First, cut out all dead wood and weak shoots, then in bushes of vigorous habit trim one-half to two-thirds of the past season's growth. Teas and Hybrid Teas should be trimmed rather less. Ramb-

lers and other climbers that bloom on the past seasons wood should be pruned back strong after they have finished blooming. Remember, Pruning most roses induces new growth and the new growth produces bloom. Prune too when you plant if the bushes droop, too much top is a disadvantage and pruning gives the roots a chance to get re-established.

Roses in Pots and Under Glass

Roses ordered in June or early Summer may be started in pots or in greenhouse benches, (use pots four inches across the top for one-year roses and six-inch pots for two-year roses) or if you have them in pots, plunge pots and all in open ground during the Summer in a partially shaded place when they can be cultivated and kept healthy and then take indoors before cold weather. Renew half the earth in the pots without disturbing the roots any more than possible; use nice turfy soil with some clay and liberally mixed with well rotted cow manure and then bring into a room where they get plenty of sunshine and a regular temperature of about fifty degrees at night and seventy-five degrees during the daytime. Water enough to keep them in good growing condition. A close watch must be kept for all manner of insect enemies and the proper remedies applied before they have any time to make headway. (Rose Nicotine is good, see page 131.)

In the Fall we offer roses specially prepared for Winter blooming, and these same roses if rested off in a cool place, after the blooming period, may be planted out the following Spring and will grow and bloom with renewed energy. The best varieties for growing indoors will be found on page 7.

Insect Enemies

Roses in pots and under glass are more liable to be attacked by injurious insects than those in open ground, but with a little care and attention you can easily keep them clean and thrifty. Healthy, vigorous plants are not often hurt by insects, the weaklings suffer most. This is another reason why good plants in the start are most economical in the long run.

It is, therefore, very important to keep your plants healthy and vigorous, and we know of nothing so good for this purpose as occasional applications of the wonderful new plant food "Bonora," recommended by the Government Experimental Stations, Department of Agriculture, etc., as the finest plant food yet produced. See directions on every package. Small size, feeds twenty-five plants, six months. Price, 30c., postpaid; large size can, enough for one year, 60c., postpaid. (See page 131.)

If Troubled with Green Fly

Spray vigorously, covering thoroughly every part of the foliage. One of the best remedies you can get is Thompson's Rose Nicotine. Prices, 30c. and 65c., as offered on page 131. Sulpho-Tobacco Soap is also good or Kerosene Emulsion made by mixing two parts of Kerosene with one part of sour milk, and when the compound has thoroughly united so as to form a white jelly, dilute with twenty parts of soft water. The best way to apply any of these remedies is by means of a sprinkler.

The "Goodrich," "Tri-jet," and "Auto-Spray," offered on page 131, are all good.

For the Rose Beetle

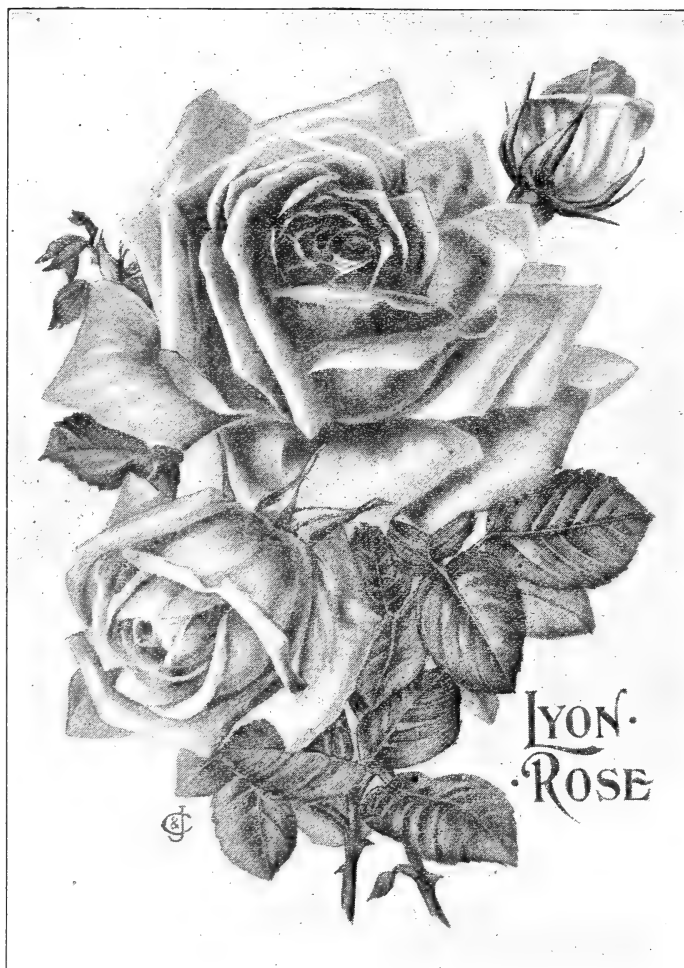

Hand picking in the early morning is best. Bordeaux mixture is one of the best preventives for mildew and black spot, which are fungous diseases usually caused by continued wet weather, or a safer thing to use is one-half ounce of sulphide of potassium to one gallon of water, and spray about once a week.

NEWEST ROSES — 1908

LYON—ROSE

Here is a splendid new **Hybrid Tea** direct from J. Pernet Ducher, the famous rose grower of France. (Mad. Melanie Soupert crossed with an offspring of Solid d'Or) such parents lead one to expect a rose of rare excellence. The form is full and globular with large broad petals of good texture. The flowers are remarkably rich in color, being a "shrimp pink at ends of the petals, centre coral red or salmon pink shaded with chrome yellow." It is "very fragrant" and above all a "perpetual and incessant bloomer." Wherever shown in Europe it has been enthusiastically praised and given the highest awards. At Lyons it received the "Prize of Honor with warmest congratulations of the judges." We feel that we can safely recommend it as one of the best of the new roses. Price, one-year plants soon as ready, \$1.50 each, delivered. Orders booked for May 1st.

BABY DOROTHY ROSE

(Maman Levavasseur)

In size, habit of growth and abundance of bloom just like its parent the Crimson Baby Rambler except that the blossoms are beautiful bright pink of the Dorothy Perkins shade; grows about twenty inches high, with healthy foliage and blooms incessantly the whole Summer, frequently having 100 to 120 blossoms on a single bush. Makes a splendid companion for the Crimson Baby Rambler; still new and scarce. Price, one-year plants, 75c. each.

Countess of Gosford (H. T.) — Salmon pink, rose and pink running into each other; the base of petals suffused saffron yellow, and the whole bloom shaded salmon. The blooms are of perfect form, large, full, very long and pointed; awarded Gold Medal National Rose Society of England.

The flowers of the rose **Dean Hole** are large, of great substance and fine form; color silvery carmine shaded salmon, absolutely distinct and by far the finest in its way of color. "STANDARDS" or TREE ROSES

Standard Rose, "Frau Karl Druschki"

An American tourist travelling in England when Tree Roses were in bloom, describes them as "Mammoth bouquets of roses held up by stems like the trunks of little trees—4 to 5 feet high." On this side of the Atlantic very few have been planted as yet, because of the erroneous impression that they are difficult to grow, whereas, in reality, they require no more care than bush roses.

All the Winter protection required is to loosen the soil at the roots enough to lean the plant so that the top comes near the ground, then it can be covered with soil or two boards nailed together V shaped and filled with dry leaves. In the Spring the weak shoots should be cut out and the stronger ones pruned back to three or four eyes.

Tree roses occupy but little ground space and are very imposing when planted among shrubbery or perennials. Along the sides of a walk they form an avenue effect. They can also be planted among or back of a collection of bush roses—thus making a two-storied rose bed as it were.

The Tree Roses we offer are exceptionally choice, with sturdy roots and well-balanced tops. They will positively bloom generously this season. These are the most desirable varieties:

ALFRED COLOMB (H. P.)—Large globular flowers of bright rich crimson.

AMERICAN BEAUTY (H. P.)—Rich glowing crimson.

FRAU KARL DRUSCHKI (H. P.)—Snow white.

GENERAL JACQUEMINOT (H. P.)—Best red in this class.

MAD. GABRIEL LUIZET (H. P.)—Soft flesh pink.

MRS. JOHN LAING (H. P.)—Clear shining pink; immense.

PAUL NEYRON (H. P.)—Immense double flowers of rich deep pink, one of the finest.

ULRICH BRUNER (H. P.)—Rich crimson scarlet.

GRUSS AN TEPLITZ (H.T.)—Often called the "reddest of red roses;" fragrant and free blooming.

HERMOSA (B. C.)—Clear bright pink, one of the best.

LA FRANCE (H. T.)—Lovely large fragrant flowers of fine peach-blossom pink.

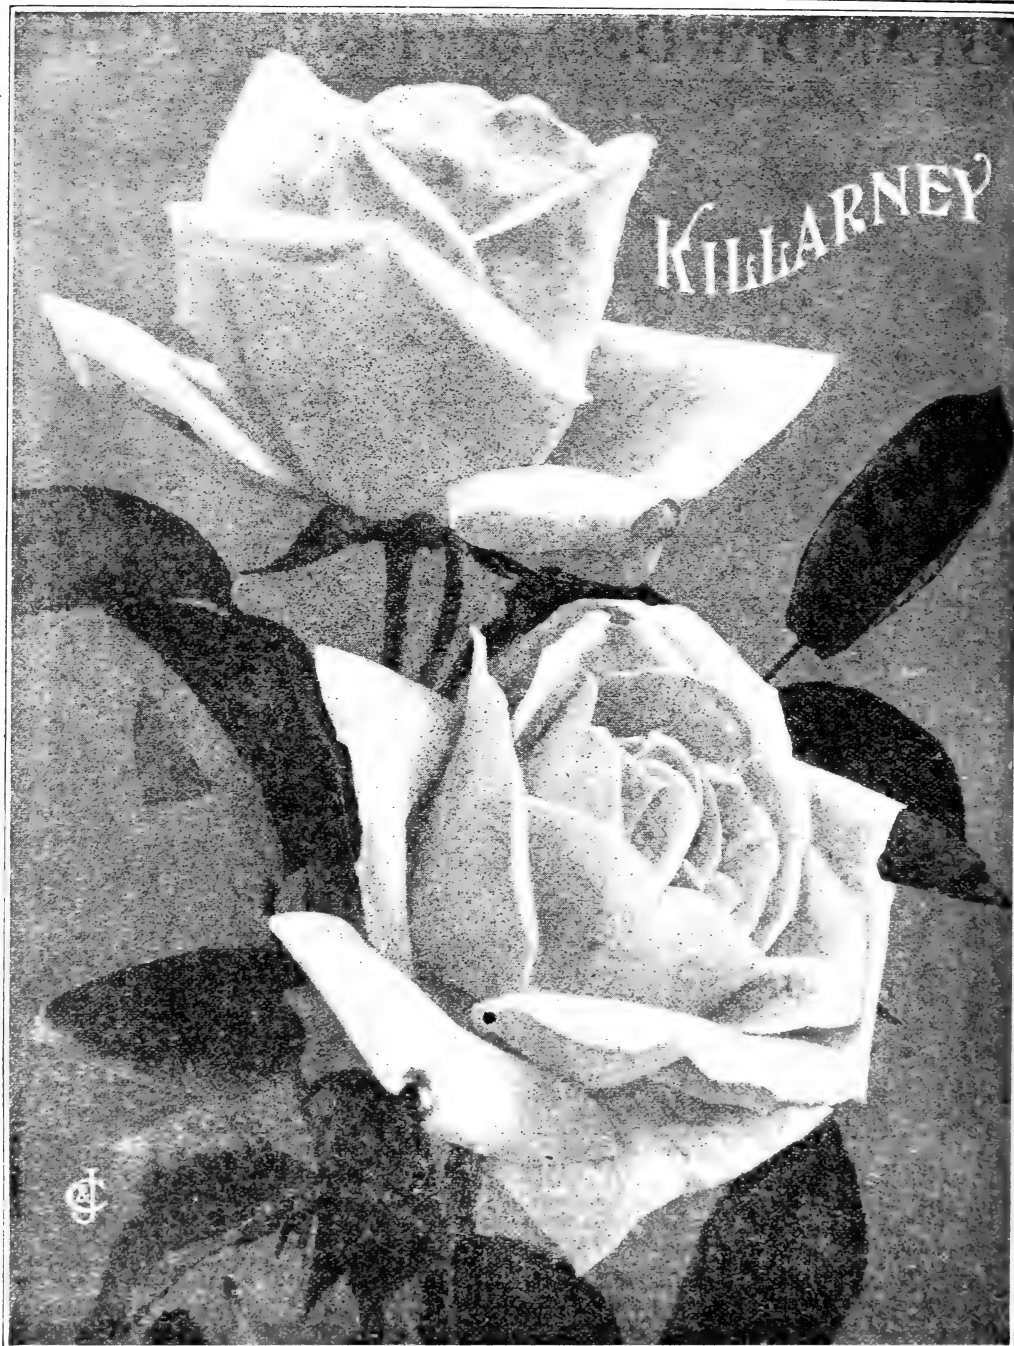

MAD. CAROLINE TESTOUT (H. T.)—Large flowers of clear cherry-red, finely edged with rose.

BABY RAMBLER (P.)—The famous new crimson rose that blooms so freely all Summer through.

MARECHAL NIEL (T.)—The famous pure deep yellow rose of delicious fragrance.

OUR RELIABLE COLLECTION

Equipped with the benefit of 48 years' experience in intelligent rose growing, by our faithful attention to the wants of customers we have won a confidence that we consider one of the most valuable assets of our business. ¶ Our appreciation of this confidence therefore, makes us feel especially the responsibility of selecting from among 200 or 300 Teas, Hybrid Teas and Chinas, 12 Roses which we can recommend as the most reliable for general planting. ¶ There are so many beautiful roses nowadays that **it would not be just to say of any 12, "These are the best."** But we do say that in this set of 12 each one contains the qualities of a high grade rose. They are all strong, vigorous growers, bloom abundantly and all are among the hardiest in this ever-blooming class. Just enough in this collection to fill a bed 3 feet wide by 8 feet long. They will bloom the first season and every succeeding season, all Summer long, even the one-year size; best about them, however, is the beauty of the flowers, in form, color, fragrance, every way; but read the descriptions, and then order.

We have been growing this rose indoors and out for three seasons and feel more enthusiastic about it than ever. EVER-BLOOMING TEA ROSES

The Roses in this class are highly valued because of their fine colors and exquisite tea fragrance. They will bloom freely from June until November, even the one year old size (two year old plants of course will bloom more). If planted in the Spring so that they may become thoroughly established during the Summer, they will, with few exceptions, prove hardy here, with protection during the Winter.

We wish to remind our friends of the superior quality of these plants; they are not the small slips so often sent out, which have been forced under a high temperature in little "thumb pots" into a quick unhealthy growth, but these plants are the product of years of experience and our own improved method of culture, which insures plants of the greatest possible vitality and abundance of bloom.

Below we list the best varieties in this class which have not already been included in the special planting collections on the foregoing 15 pages and shown by index, page 50. (See prices below.)

Etoile de Lyon—About the best all around yellow

Beaute Inconstante This is a fine healthy growing rose, an abundant bloomer; the color is quite variable, sometimes the flowers are distinctly striped and variegated, but are frequently of entirely different colors, some being clear, satiny pink, some red and others coppery orange, passing to cream white with many intermediate shades between. Always gives satisfaction.

†**Bridesmaid** Fine large full flowers, delightfully tea-scented, clear rose pink with crimson shading. A good healthy grower, makes elegant buds, very handsome, and one of the best for cut flowers.

ETOILE DE LYON

Corinna A new English Rose of great beauty. Color, flesh-pink, shaded with rose and tinted with coppery gold. The flowers are of large size, excellent shape and very freely produced all season.

The colors vary so much that hardly any two flowers are alike. The bush is a good, healthy grower and a true ever-bloomer.

Furstin Hohenzollern New, attractive and very rare; color, exquisite lilac rose on ochre ground, a fascinating combination seldom seen; has a delightful but delicate fragrance. A vigorous grower and good bloomer.

Genl. Gallieni Splendid, large well filled flowers, fine rich brownish red, very sweet; a healthy vigorous grower and constant bloomer.

A Little Book About Roses

Success With Roses is not difficult when you "know how"—and here we offer a little book entitled "How to Grow Roses," which tells "how" in a clear, simple way; easy to understand and easy to follow. How to plant, prune and protect them, etc., etc. It is beautifully illustrated with photographs and contains information worth many times its cost. Price, 10c. each, postpaid, or free, on request, with a \$1.00 order.

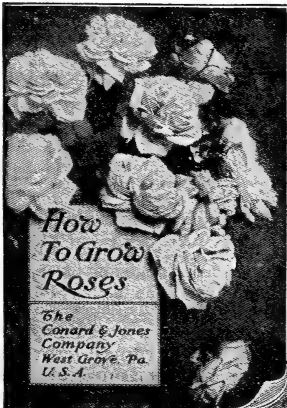

THE CONARD & JONES CO., West Grove, Pa.

July 1, 1907.

Gentlemen—I want to say that the Rose trees you sent me, and in fact, every-thing I purchased from you, are all doing fine, and this in spite of a very cold Spring. The Rose trees have done splendidly and every day they seem to grow bigger. It is with great pleasure that I write this letter especially as I was informed that I was doing a risky thing to send away to Pennsylvania for rose bushes to grow in Maine.

Faithfully yours,

FRANK J. A.—, Portland, Me.

CHOICE HYBRID TEA ROSES

This is, we believe, the most popular class of Roses now in cultivation. These varieties are the result of a union between the Ever-blooming Teas and the hardy Hybrid Perpetual class, thus combining the exquisite richness of coloring and beauty of form in the one with the hardiness, vigorous growth and pungent fragrance of the other.

It is rather exceptional in the Roses of any other class to find so many excellent qualities and when you add the splendid feature of blooming so freely and continuously throughout the season, it is easier to understand why these Hybrid Tea Roses are so popular.

We list here the best standard kinds of this class which together with ★Gruss an Teplitz, Magnafrano, ★Killarney, ★Mad. Eugene Marlitt, ★La France and OTHERS on pages 11 to 25 inclusive, are undoubtedly the finest to be had anywhere.

"Kaiserin Augusta Victoria"—One-half Natural Size

★**Kaiserin Augusta Victoria** This grand rose is still unsurpassed in beauty. Extra large, finely formed flowers borne singly on strong upright stems, very deep, full and sweet; color, pure white shading to lemon; a free bloomer. One of the finest roses introduced for many years.

Instituteur Sirdey Buds reddish-yellow, open flowers deep golden yellow, with fine ruffled petals, quite distinct and handsome.

Intensity A cross between Gruss an Teplitz and General McArthur, retaining all the admirable qualities of the latter with much of the darker beauty of the former. Color, a very dark crimson scarlet, approaching crimson maroon in the older flower.

Admiral Schley Color, rich velvety scarlet, finely shaded with violet crimson, very bright and handsome, makes elegant buds and splendid large full flowers, delightfully sweet. The bush is a clean, healthy grower with bright green foliage, and blooms abundantly.

Ards Pillar Rich velvety crimson, the perfection of an exhibition, garden and pillar rose, foliage attractive. The blooms are produced with great freedom, and are large, full and of cupped form.

Augustine Guinoisseau

(WHITE LA FRANCE)—This magnificent new rose is a Pure White La France, having just a breath of rose-tinted blush, decidedly clouding the depths of its broad petals; the buds and flowers are extra large, very full and finely formed; the fragrance is delicious. It is a free, continuous bloomer.

Beatrix de Buisseret A beautiful rose in the way of Caroline Testout, very large flowers, quite full and double; color, lovely silver rose passing to rosy carmine red. Very free bloomer and delightfully fragrant.

Bessie Brown This is a noble rose of extra fine quality and bears large full flowers of extraordinary depth and fullness and is deliciously sweet; color, pure white, clouded and flushed with flesh pink. Price, 20c. each; larger size, 25c., postpaid. Two-year size, 40c., by express.

Clara Watson The flowers are very graceful, resembling Bridesmaid in form, and are produced in remarkable profusion. The buds are very beautiful and are supported on long stems, making it desirable for cutting. The color is salmon pink, very difficult to describe.

Countess of Derby Form identical with the elegant "Catherine Mermet," but infinitely superior in growth and quantity of bloom produced. Blooms are large and symmetrical, with pointed centres; color, salmon in centre with outer petals rose; growth vigorous and erect, branching freely; deliciously tea-perfumed.

David Harum A truly superb new rose, peach-blossom pink, flowers extra large and beautiful and richly tea-scented, a very free bloomer, producing lovely buds and flowers the whole season.

Duchess of Albany This is a superb rose, closely resembling La France, but much deeper in color and a better grower; the flowers are extra large, exceedingly beautiful, very double and full and deliciously sweet; color, lovely rose pink, very deep and exquisitely shaded; a constant bloomer.

General McArthur A grand new ever-blooming rose, both buds and flowers are extra large; color, bright glowing crimson scarlet; a vigorous grower, every shoot producing a flower of most intense brilliant color.

Prices For all on this page (unless otherwise noted), 15c. each; 6 for 60c., postpaid. Two-year old plants (unless otherwise noted), 35c.; 6 for \$1.75; 10 for \$2.50 by express, purchaser paying charges; or \$3.00, delivered free.

BEAUTIFUL EVER-BLOOMING CLIMBING ROSES

These are the Roses that will add so much to the beauty of your home; especially for porch or trellis or for covering an arbor or archway.

Your success and satisfaction will depend mainly upon two things: get kinds suited to the conditions of your place and climate and then give them plenty of good rich soil deeply mellowed. (You can often double the growth of a climbing rose by giving it the right kind of care and nourishment.)

There are two distinct classes of climbing roses:

1. The hardiest, (including such as Philadelphia, Dorothy Perkins, etc., see pages 38 to 42) which burst forth into magnificent masses and clusters of bloom about the middle of Spring and continue beautiful for three to six weeks on into Summer.

2. The other class are the Climbing Tea, Hybrid Tea or Ever-blooming Roses, most of them hardy in this latitude with protection. If favorably located and kept in good growing condition, they will often bloom luxuriantly almost without interruption from Decoration Day (May 30th) until Thanksgiving Day. See this and following three pages.

4 Excellent Porch Roses

4 COLORS EVER-BLOOMING

GOLDEN RAMBLER (YELLOW)

"ALISTER STELLA GRAY"

This is a very beautiful variety. The color is rich apricot-yellow, soon changing to pure white, with bright yellow centre. The flowers are large, full and fragrant, and it is a most constant and profuse bloomer; a bush on our own grounds, after blooming *all Summer and Fall*, had 75 to 100 buds and flowers on at middle of November. Plant near wall or trellis where it can have some shelter and support. Price, 15c. each, two for 25c.; larger size, 20c., two for 35c., postpaid. Two-year size, 35c., two for 60c., by express.

★MRS. ROBERT PEARY (WHITE) (Climbing Kaiserin Augusta Victoria)

One of the very best in this class; a strong vigorous grower, throwing up canes six to eight feet high in a season. Flowers extra large and sweet; color rich creamy white, delicately tinted with lemon. Blooms constantly the whole season. Price, 15c. each; larger size, 20c., postpaid. Two-year size, 35c., by express.

CLIMBING METEOR (RED)

One of the finest bright crimson hardy Ever-blooming Climbing Roses ever introduced; makes exquisite buds and large beautifully shaped flowers of the true Jacqueminot color. Price, 15c. each; larger size, 20c., postpaid. Two-year size, 35c., by express.

CLIMBING LA FRANCE (PINK)

SPECIAL No. 70 Above 4 in strong 1-year
OFFER plants, 50c., postpaid.
2-year plants, \$1.00, by express.

Archways for Roses are easily made. Use either wooden posts with an arch on top (cedar wood is best) or use iron pipe or iron rods which can be bent easily to the shape desired. Two arches made of iron rods one-half inch in diameter placed side by side, (one or two feet apart) and covered with chicken wire make an ideal arch. Point ends of the rods and run them in the ground about two feet for stability. Size usual for archways is about eight feet high and five feet wide. Or we can tell you where to buy them ready made.

It is a successful combination of quality, variety and beauty at a very moderate price. Birdie Blye is a beauty. We grow more enthusiastic over it every year. Its splendid pink flowers are borne in luxurious clusters, veritable bunches of fragrance the whole Summer long—and the other 5 are equally fine.

The Most Magnificent Hardy Crimson
Climbing Rose in Existence

SPLENDID flowers, $2\frac{1}{2}$ inches across and perfectly double. Borne in grand clusters, completely covering the whole bush. Color, pure deep rich crimson, far brighter and more intense than the old "Crimson Rambler." The "PHILADELPHIA" holds its bright dazzling color a long while, which adds greatly to its value. Has handsome foliage, and is a most abundant bloomer. Undoubtedly the brightest of all hardy crimson climbing roses yet produced; splendid for covering porches, trellises, screens, fences, etc. Is a strong, quick grower, perfectly hardy and needs no Winter protection. Makes a great sensation wherever seen. People declare they never saw such immense quantities of roses BORNE ON ONE BUSH, or any flowers of such bright dazzling crimson color. Frequently used in great quantities, because, either as a hedge, or on fences it makes a magnificent show.

HOOSICK FALLS, N. Y., March 15, 1907.

THE CONARD & JONES CO.

GENTLEMEN: I thank you for new catalogue. Last year I purchased from you three "Philadelphia" Ramblers, three years old: They grew, blossomed, and were fine last year; this year I expect they will do as well *** Yes, I had a thousand blossoms on my three bushes, they extended up side of porch eight feet. Therefore I can testify to the quality. I got a lot of pleasure out of my very small investment.

Most truly,

GEORGE M. L.—.

"Philadelphia" Rambler was awarded a "CERTIFICATE OF MERIT" at the great London Temple Flower Show, which is the finest of all the English horticultural exhibitions.

Introduced
1906, by
The Conard
& Jones Co.

American Pillar

If ever there was a rose constituted to stand the trying conditions of our American climate, we have it in this unique New Hardy Rose described below. It is sure to attract attention even at a distance because of its great mass of bloom that fairly covers the bush. Flowers are enormous, measuring 3 to 5 inches across, and very durable. They are borne in immense clusters and make a remarkable sight. Color is a chaste shade of pink, while in the centre of each flower is a cluster of bright yellow stamens, these are followed in the Autumn by pretty clusters of brilliant red seed hips, which hang on through the Winter to brighten the bushes and feed the birds. It is one of the first to start growth in the early Spring, and here holds its leaves of lively green till far past Thanksgiving Day, and never have we seen it troubled with insects. "American Pillar" is an ornamental and satisfactory addition to any lawn. Price, 1-yr., 25c. ea.; larger size, 35c., ppd. 2-yr., 50c.; ex. size, 2-yr., 75c.; 3-yr., \$1.00 ea., by exp., purchaser

FOR COLD CLIMATES

If you live North where roses sometimes Winter-kill, you will be delighted with these perfectly hardy varieties. They are loaded down in the early Spring with the loveliest and most beautiful roses imaginable. Flowers are deliciously fragrant. Every one who has tried them praises them, and we consider them among the most valuable climbing roses we ever introduced. For planting along a wire fence, stone wall, trellis, etc., they are unsurpassed, and where planted together the colors harmonize beautifully.

[Dean Bond, a true lover of roses, recently wrote us from Swarthmore College, Pa.: "We are having a feast of roses these days, very beautiful. The "Ruby Queen" is just coming into bloom and is a sight to see."]

May Queen Splendid large double roses of clear bright pink, and deliciously sweet-scented. Blooms tremendously. Literally bushels of flowers can be picked from a fully grown bush.

I want to say a word in regard to the Rambler Rose, which I got of you in 1904. Last Summer it had one shoot on it 28 (twenty-eight) feet long all the growth of one season.

Your Catalog said it sometimes grows to a height of 15 feet in a season, but mine grew to nearly double that height and was a wonder to everybody who saw it.

Very truly yours,
P. W. W—

Hardy Memorial or Evergreen Roses

ESPECIALLY RECOMMENDED FOR CEMETERY PLANTING

Sometimes called the *Wichuraiana* Roses but appropriately classed as "Memorials" because everywhere acknowledged to be the most suitable and satisfactory roses one can get for cemetery planting. They will climb when trained, or if left alone they creep along the ground as closely as an ivy and make a dense mat of shiny dark green foliage. The leaves are of leathery texture, practically insect proof, and remain green on the plants nearly all Winter. They bloom in profusion during June and July, and the single ones bear red berries in the Autumn. Entirely hardy, and when once planted take care of themselves. They are excellent for training over graves or over rough ground, rocks, stumps or banks.

★**HARDY SINGLE WHITE MEMORIAL ROSE WICHURAIANA**—Hardy as grass, will grow in sun or shade, poor ground or rich. HARDY "IRONCLAD" RUGOSA ROSES

These Hardy Rugosa Roses and their Hybrids seem just suited for our North American climate as they are so tough. They make dense, sturdy, compact bushes, four to six feet high and very ornamental. Their dark, rich leathery foliage is oddly wrinkled, shiny and remarkably free from insect pests. Some bloom all Summer, others but once, but are followed in the Autumn with a profusion of beautiful orange red or crimson fruits. The plants are hardy as oaks, and do well in the most trying places; seashore, mountains or anywhere. Excellent for making hedges or planting on the lawn with shrubbery or in isolated groups. Rugosa Roses on their "Own Roots" are scarce, hence higher in price, but we offer only "Own Root" stock of these, because they give so much better satisfaction than "Budded Plants," and really cost less in the long run. *If you want something unique, appropriate and permanent, try some of these on your lawn.*

2 CHOICE DOUBLE RUGOSAS | 2 SPLENDID SINGLE RUGOSAS

Sir Thomas Lipton (WHITE CENTURY)—

This grand rose requires no recommendation beyond the testimonials of those who have tried it. We consider it, without exception, the best double white rose in its class; beautiful in foliage, early and constant in bloom, of most vigorous habit, iron-clad constitution, producing a bush 5 or 6 feet high and as great in diameter. The original bush on our grounds (10 years old) grew to be 20 feet in circumference and was usually in bloom from the third week in May until November. Price, good mailing plants, 25c. each; larger size, 35c., postpaid. Two-year bushes, 50c. and 75c. Extra three-year bushes, \$1.00 and \$1.50, by express. (See cut.)

Introduced and for sale only by The Conard & Jones Co.—A magnificent rose; a splendid acquisition in this valuable class; stock limited. THE CONARD & JONES CO.

The roses I sent for came promptly and in splendid condition, the leaves were not wilted in the least. I set them out two days ago and they look better than the roses I put out last year. I did not expect as large plants for the money.

Gratefully yours,
MRS. H. H.

SOLEIL D'OR—"SUN OF GOLD"

This is a truly magnificent rose and one of the grandest varieties in cultivation. It is a cross between Persian yellow and Antoine Duchere, but is entirely distinct both in habit of growth and color of flower. It is a strong robust grower with stiff straight branches and heavy deep green foliage; the flowers are very large and globular, perfectly full and double, and petals thick and leathery; it has great substance, and is remarkably durable. The color is entirely different from any other variety in cultivation, a mixture of reddish gold, orange yellow, nasturtium red and rosy pink, a combination difficult to describe—except in the name, "Sun of Gold." It is entirely hardy, needs no protection and will bloom regularly every year, the only difficulty about it is, it is so difficult to propagate on its own roots, that we can now only offer strong two-year budded plants grown in open ground. Price, dormant plants (up to April 1st), 60c. each; after that date, potted plants, 75c. each by express.

Flowers of Harrison's Yellow are intensely rich yellow

THE OLD "YORK AND LANCASTER" ROSE

This valuable rose belongs to the centifolia class. Is a remarkably vigorous grower and perfectly hardy. It is of *rich historic interest*, dating back to the War of the Roses between the Royal Houses of York and Lancaster; said to have originated when these warring factions became united, its color representing the white of the Yorkists and the red of the Lancastrians.

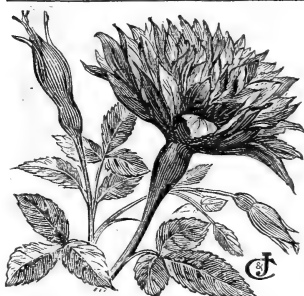

Our illustration gives but a faint idea of its striking appearance; buds and flowers are wonderfully marked, red and white, sometimes blotched and sometimes striped, full and double.

It is highly prized where known, but scarce because very difficult to propagate. It can be bought in only one or two places in the United States. Our plants are on their own roots and when established will last a lifetime and be a permanent ornament on your grounds. Price, 1-yr. plants, 50c. each, postpaid. Strong 2-yr. plants, \$1.00 and \$1.50, by exp.

TRUE ENGLISH SWEET BRIER

Rosa Rubiginosa

This is the True Eglantine, and highly valued for the delightful fragrance of its flowers and young growth. It is entirely hardy, and when once planted will take care of itself. Makes a fine hedge planted two feet apart, or is equally good for a group or single specimen. Flowers pink. Price, 2-yr. dormant plants, 40c. each; \$4.00 per doz., by exp.

THE GREEN ROSE (Viridiflora)

St. Patrick's Day

HARDY HYBRID PERPETUAL ROSES

THE Hybrid Perpetuals are considered the most valuable of all roses, because they bear the largest, sweetest, and most brilliantly colored flowers, and are so hardy and vigorous they live over Winter without protection, and continue to bloom regularly from year to year. Their grand

flowers are of all shades of red, crimson, scarlet, pink and white, but no yellows. They thrive and bloom finely in all sections of the country, and should generally be planted in open ground, as but few varieties are suitable for house culture. Some kinds do not bloom till the second year, but when fully established bloom regularly at the usual time, and occasionally during the Summer and Fall months. Though called "Perpetual" they are not constant bloomers, but are the finest and most beautiful of all hardy roses.

We offer the choicest and most beautiful varieties in cultivation, and send strong, healthy plants, all on their own roots. Please read carefully our special guarantee offer on page 6.

HARDY
HYBRIDPerpetual Roses FOR GENERAL
PLANTING

★ GENERAL JACQUEMINOT

The Premier Hardy

Crimson Rose

Famous the world over as one of the most magnificent Hardy Crimson Roses ever introduced. It is a strong,

vigorous grower, entirely hardy, an early and profuse bloomer, and buds and flowers are considered models of perfection, and its brilliant shining crimson color is the stand-

ard of color by which other roses are judged.

In fact, it is almost unequalled in beauty of form and brilliant intensity of color. It is not a new variety, but so valuable that it is frequently scarce and difficult to obtain, as almost everyone wants a "General Jack." This year, however, we believe our stock is ample, and hope to have enough to meet all demands.

C. & J. Pedigree Canna Lilies

C. & J. Canna Lilies (not to be confused with the old-fashioned flowerless kind) are a distinctly new strain, producing great masses of large lily-like flowers all Summer long and gorgeously beautiful. "King of Bedding Plants" is a title they have, and richly deserve. They begin to bloom by the end of June and never stop till frost. The flowers are a veritable blaze of color in every shade imaginable (except blue) and either plain, dappled, edged, striped or variegated. Plants range in sizes from 2½ to 7 feet high with foliage of green or bronze often striped like some rare tropical plant. So you see they are suitable for planting in beds of all possible shapes and sizes or for placing along fences, walls, porches or driveways, for screens, hedges and border plants. (See our suggestions and Directions "How to Grow," page 59). They grow most anywhere, but do best in rich soil. Canna Lilies ordered early should be started indoors. Plant out when the ground is warm (say May 10th in this latitude). Easy to grow and multiply rapidly. You are sure to be pleased with the C. & J. strain.

NEW GORGEOUS FLOWERING BRONZE LEAVED CANNA

WILLIAM SAUNDERS

Originated and introduced by The Conard & Jones Company, 1907

This is a cross between the famous Bronze Leaved kinds "Brandywine" and "Mount Etna." The flowers are bright scarlet, produced in great clusters often a foot across and each on branching stems about 4 feet high. Individual flowers, often 5 inches across, of remarkable substance and durability. It is a strong, vigorous grower and self-cleaning, which means flowers fresh every morning from June till frost.

"Wm. Saunders"
Canna has never yet
failed to win first prize.

PRICE—Good plants
\$1.00 each, 6 for \$5.00
Delivered Free

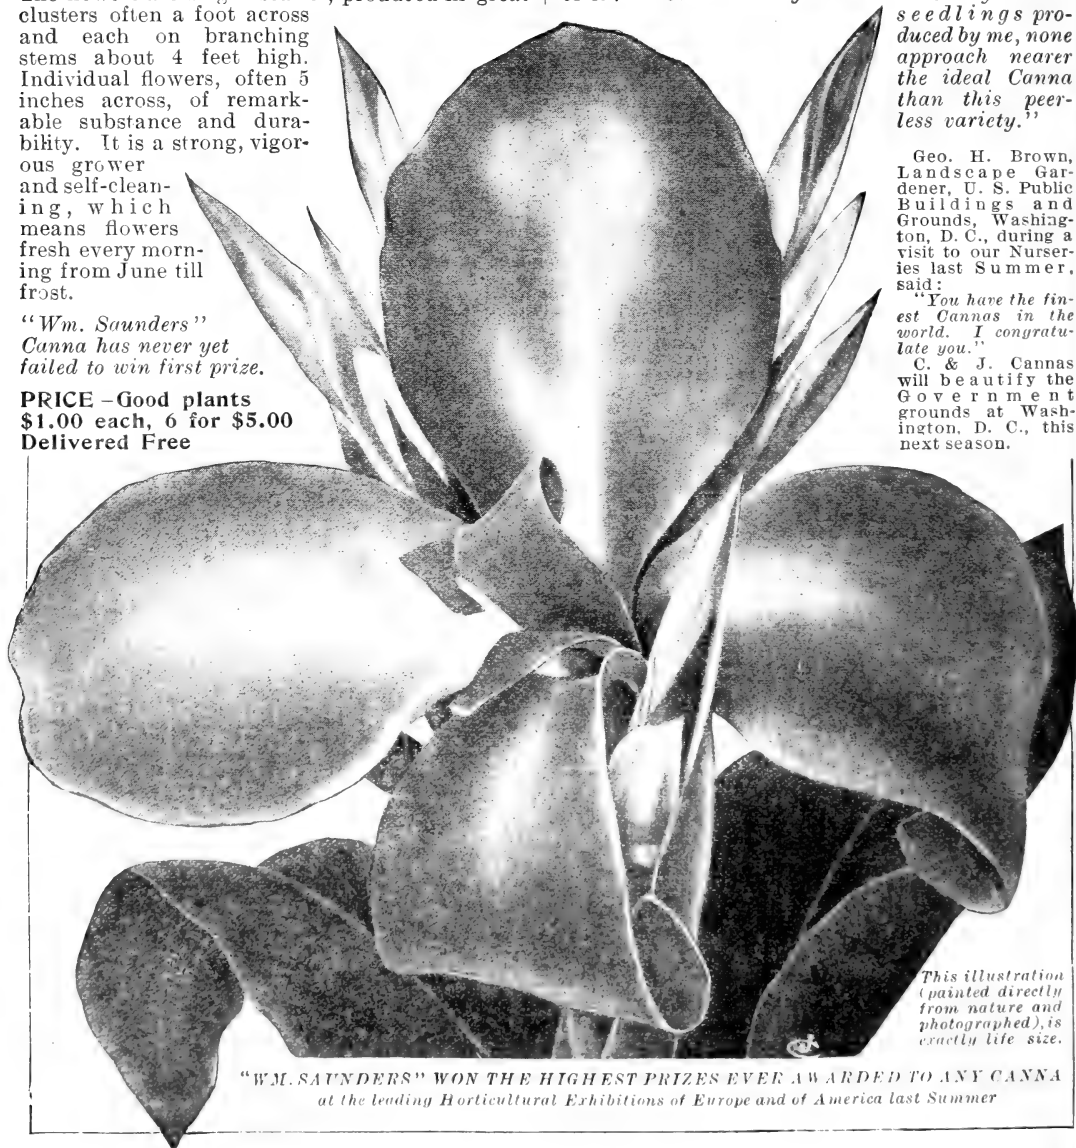

In dedicating this Canna to Dr. Wm. Saunders, of Ottawa, Mr. Wintzer, originator, says of it: "Of the many thousands of hybridized

seedlings produced by me, none approach nearer the ideal Canna than this peerless variety."

Geo. H. Brown, Landscape Gardener, U. S. Public Buildings and Grounds, Washington, D. C., during a visit to our Nurseries last Summer, said:

"You have the finest Cannas in the world. I congratulate you."

C. & J. Cannas will beautify the Government grounds at Washington, D. C., this next season.

This illustration (painted directly from nature and photographed), is exactly life size.

"WM. SAUNDERS" WON THE HIGHEST PRIZES EVER AWARDED TO ANY CANNA
at the leading Horticultural Exhibitions of Europe and of America last Summer

THE NEWEST CANNAS FOR 1908

As extensive originators and introducers of first-class Cannas, we have made it our special aim to bring their standard of excellence to the highest possible point. Therefore, we are particularly careful in introducing new ones, to select from our extensive list of valuable seedlings only those that have shown a decided superiority over existing sorts. Always send to us for the original stock. All the Cannas on this page were originated by and can be had only from us.

Minnehaha

(No. 2744. C. & J. Co., 1908)

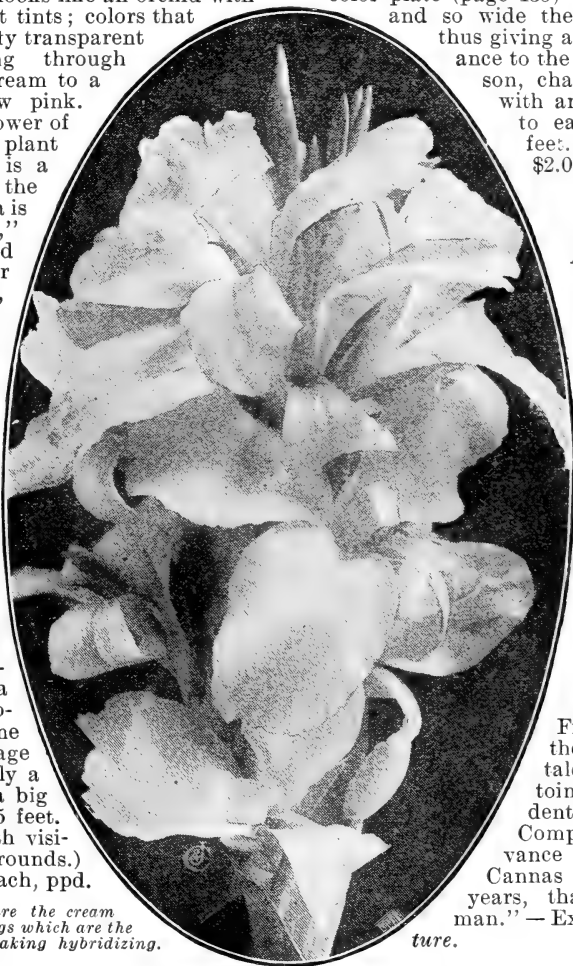

Form much like Mont Blanc, see illustration. Blossoms are extra large and borne in great clusters; petals are long, gracefully curved and have wavy edges. It looks like an orchid with its exquisite opalescent tints; colors that remind one of a dainty transparent sea shell, deepening through shades of gold and cream to a centre of peach blow pink. To have obtained a flower of this light color on a plant with *bronzed* foliage is a signal triumph for the originator. Minnehaha is an entirely new "break," extremely beautiful and different from any other yet introduced. Height, 3 to 4 feet. Price, good strong p'lants, \$2.00 each, prepaid.

Rosea Gigantea

(No. 2698. C. & J. Co., 1908)

This beautiful new variety has extra large flowers which are borne in such great abundance that the mass of color on each plant is truly amazing. Single petals are $2\frac{1}{2}$ inches across; color, a deep rich rose, almost a coral carmine. Plants make a vigorous growth, producing unusually fine clumps of green foliage so that it requires only a few plants to make a big show. Height, 4 to 5 feet. (A great favorite with visitors to our trial grounds.) Strong plants, \$2.00 each, ppd.

These 4 new Cannas are the cream from more than 1000 seedlings which are the result of 12 years of painstaking hybridizing.

Gladio-flora

(No. 2675. C. & J. Co., 1908)

Remarkable for the unusual shape of the flowers which look like large Gladiolus. Petals are not long and tongue shaped as shown on color plate (page 135) but short and rounded and so wide they overlap each other, thus giving a very attractive appearance to the flowers. Color is crimson, changing to carmine rose with an uneven edge of gold to each petal. Height, $3\frac{1}{2}$ feet. Price, strong plants, \$2.00, each, prepaid.

Meteor

(C. & J. Co., 1908)

A vigorous grower with healthy foliage. Each root usually produces five or six trusses of bloom, which continue flowering the entire Summer. Its splendid flowers are produced in great abundance; color, a deep crimson, unusually pleasing and effective. For color illustration and special offer of this new Canna, see pages 134 and 135. Price, strong plants, \$1.00 each, postpaid. (See special offer at foot of this page.)

"Next to that clever Frenchman, M. Crozy, the world owes more to a talented American, Antoine Wintzer, vice-president of The Conard & Jones Company, for the great advance that has been made in Cannas during the past fifteen years, than to any other one man." — Extract from *Horticulture*.

SNOWY WHITE CANNA, MONT BLANC (See illustration above)

Mont Blanc ($3\frac{1}{2}$ feet) introduced by us in 1902, and is to-day, by all odds, the finest White Canna in commerce; in fact there is no other variety that can compare with it. It has a vigorous constitution, blooms early and continuously in the greatest profusion during the whole growing season. Its foliage is bright glossy green, very large and handsome, and so thick and leathery it is not often injured by rain or wind. It is a strong-growing variety, and will produce from fifteen to twenty flower stalks in a season. Its great masses of snowy-white blossoms contrast finely with the splendid crimson and pink varieties, making the most gorgeous and showy flower beds for the lawn or garden it is possible to have. See illustration from photograph.

"Giant-Flowering" Canna Lilies

ALSO CALLED "ORCHID-FLOWERING" CANNAS

THESE Cannas are giants in every way. They are in a class by themselves, because of their wonderful size, and also the rare and beautiful formation of their flowers, which has given them the name of **Orchid-Flowering Cannas**. They tower above the average Canna, their height is 6 or 7 feet with luxuriant tropical foliage of broad leaves, as large as elephants' ears. The size of the flower is shown by the outline drawing on this page. A single blossom of Louisiana often measures more than 7 inches across. Under a very hot sun the fine silken petals of the average orchid-flowering Cannas sometimes show a tendency to wilt, but we feel that we have largely overcome this in our great introduction of last year, "New York," which has still the exquisitely formed flowers and, at the same time, petals of such excellent substance that the hot sun does not affect them.

★New Orchid-Flowering Canna, "New York"

(6 ft., C. & J. Seedling, No. 1549) Truly an acquisition. The size and vigorous habit of the plant, the more than ordinary beauty of its quiet, purple foliage, and the size and brilliancy of its torch-like flower heads, combine to place it immediately in the front rank of the Giant plants with orchid flowers. The foliage alone reaches up to 5 feet high, the leaves are large and broad and stand quite erect in a most tidy fashion, thus showing their beautiful coloring on both sides. They are deep green, heavily veined, and marked with a rich purple plum color that would make the plant itself attractive even if it had no flowers; but it has 5 or 6 stalks of them at once on every well-fed plant. Flowers with five petals 5 to 6 or 7 inches across, intense carmine and all above the foliage. We are sure you will like it, so we give the price of several in one order. Price, nicely started plants, 50c. each; 6 for \$2.50, delivered.

★New Hybrid Orchid-Flowering Canna, "Indiana"

(6 feet, 1905)—The foliage of this variety forms a solid mass of green 3 to 4 feet high, above which the flower spikes shoot up to a height of six feet, each one bearing fine, big clusters of orchid-like flowers. Color is a glistening golden orange, daintily marked and striped with red. Single blossoms are often 7 ins. across. Price, 35c. each, ppd.

★New Giant-Flowering Purple Foliaged Canna, "Wyoming"

(7 feet, introduced by C. & J. Co., 1905)—This is one of the most majestic Cannas in the orchid-flowering class, with the additional attraction of having a luxuriant growth of rich, purple foliage. Above this are borne great plumes of massive orange-colored blossoms, true orchid shaped, with large rounded petals that flap and flutter in the breeze like glistening silken flags. Price, 35c. each, postpaid.

★Grand Prize Canna "Louisiana" (7 feet)—At the

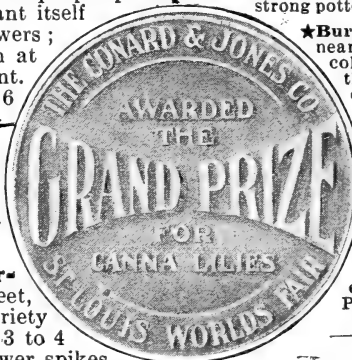

Louisiana Purchase Exposition, St. Louis, 1904, where all the finest Cannas were on exhibition—"Louisiana" was pronounced the finest orchid-flowering kind in existence. The words of commendation that come from our customers, and the magnificent showing of bloom which this great plant makes on our trial grounds—as compared with other Cannas in this class heretofore introduced—convince us that "Louisiana" will continue to hold its lead for some years yet. The plant is a vigorous grower, producing a thick mass of glossy green foliage: its flowers are like beautiful orchids; size often more than 7 inches across, and every inch a vivid scarlet. It blooms tremendously, often 4 or 5 stalks flowering at once. You cannot conceive of anything more gorgeous. Its intense beauty and brilliancy are simply indescribable. Get one and watch it. Price, strong potted plants, 25c. each; 6 for \$1.25, postpaid.

★Burbank (4½ feet)—A giant in size with

nearest approach to semi-double flowers; color, beautiful rich canary yellow, the throat finely spotted crimson. Price, 10c. each, postpaid.

Mrs. Kate Gray (5 feet)—Flowers six inches across; color, a splendid shade of rich orange scarlet, finely flaked and streaked with golden yellow tints. Price, 15c. each, postpaid.

Pantheus (5½ feet)—Flowers of extra large size, the broad, wavy petals glisten like silk, the prevailing color is orange delicately streaked with scarlet tints, and suffused with salmon; early, and a free bloomer; green foliage. Price, 10c. each, postpaid.

The 3 following Cannas only 25c.

Pennsylvania (6 feet)—Until the introduction of our new giant orchid Canna, "Louisiana," (1905), this was undoubtedly the finest hybrid orchid-flowering Canna extant. It was introduced by us in 1902. The flowers are pure deep scarlet of immense size. Price, 15c. each, postpaid.

Allemania (5 feet)—A splendid variety. The outer petals are bright scarlet with a broad yellow border, the inside colors being scarlet and dark red, beautifully mottled and variegated. Price, 10c. each, postpaid.

Giant-Flowering Canna, "Austria" (5 feet)—Flowers 6 to 7 inches across; color, pure golden yellow; a vigorous grower. Price, 10c. each.

"BRONZE-LEAVED"

CANNAS

These Canna Lilies are entirely different from any others and sure to attract attention wherever seen. The foliage, instead of being green, is a rich bronze or purple plum color, sometimes a solid shade, but often attractively striped, edged or variegated with olive brown or bronze. Ten years ago this class of cannas had no flowers worth mentioning (just a few like the little one shown in photo herewith) but because of its beautiful tropical leaves, it was prized as a foliage plant. Since then, skilled hybridizers, (our vice-president, Mr. Wintzer, is one of the most prominent) have developed these Bronze-Leaved Cannas until now they produce flowers as large and fine as the best of the green-leaved plants, in beautiful colors too, that contrast and harmonize most effectively with the dark-colored foliage. The marvelous development in the size of the flower is clearly shown in the accompanying illustration.

★**BRANDYWINE** (3½ ft.)—See page 134.

JUPITER (6 ft., C. & J. 1906)—This is a magnificent specimen of the Canna race. Imagine a plant 6 ft. high, and furnished right down to the base with an abundance of deep purple foliage; some leaves 1 foot wide and 3 ft. long, and nearly as dark as Black Beauty. Then add to this a beautiful mass of rich red flowers that crown the plant in a most effective and striking manner. Price, 30c. each, postpaid.

★**NEW BRONZE-LEAF CANNA, EASTERN BEAUTY** (4 ft.)—Flowers a charming shade of light salmon and orange, changing after 2 or 3 days to an attractive flesh pink. Free bloomer. Price, 10c. each, ppd.

★**BLACK BEAUTY** (5 ft.)—It seems to us impossible to exaggerate the beauty and richness of this Canna. It undoubtedly has the darkest and most magnificent foliage of all the purple leaved Cannas. The leaves are a black shining purple, very rich and glossy and with edges crimped and wavy. Flowers are few and small but for a foliage plant and for producing an effect of tropical luxuriance, Black Beauty heads the list. Price, 25c. each; \$2.50 per doz., postpaid; \$17.00 per 100 by exp.

★**IMPROVED BLACK BEAUTY** (5 ft.)—(Originated here and introduced by us in 1905, also attracted much attention at St. Louis World's Fair). The foliage is almost as fine as original Black Beauty, but the greatest improvement is in the flowers which are nearly 4 times as large (see photo above) and a brilliant red. Price, 25c. each, postpaid.

★**NEW BRONZE-LEAF CANNA, "CHAUTAUQUA"** (4 ft.)—A distinguished looking Canna. Flowers pure rich scarlet, intensely vivid; luxurious, tropical foliage, prettily bronzed. Especially valuable for massing. Price, 20c. each; \$2.00 per doz., postpaid; \$14.00 per 100 by exp.

★**KING HUMBERT** (4 ft.)—Has flowers as large as the largest of the orchid flowering Cannas. Bright orange scarlet streaked with crimson. Foliage is bronze with brownish green stripes, large, thick and leathery. A strong, robust grower; price, 35c. each, postpaid.

EGANDALE (4 ft.)—A fine bronze-leaved variety; pretty cherry-red flowers, borne well above the foliage; handsome and distinct. Price 10c. each, postpaid.

★**EVOLUTION** (4 ft.)—Flowers rich golden yellow; shading to a centre of beautiful blush pink; such exquisite, dainty color, mounted on the handsome dark bronze foliage, produces one of the most rare and pleasing color contrasts of any Canna in existence. Exceedingly unique and sure to attract attention. Price, 10c. each; \$1.00 per doz., postpaid; \$7.00 per 100 by express.

HIAWATHA (3 ft.)—Variegated foliage. Large flowers, with broad crimped petals. Color delicate rosy pink, with border of clear cerise. Price, 25c. each, postpaid.

JUANITA (1905) (5 ft.)—Foliage very dark green, strikingly veined and edged with bronze. Branching bloom spikes and gracefully draped in flowers of rich chrome yellow. Price, 25c. each, postpaid.

QUEEN OF HOLLAND (3 ft.)—Well-balanced plants. Foliage very dark green, heavily veined and edged with bronze, bears immense branching trusses of perfectly beautiful flowers. Color, deep rich orange. Price, 10c. each, postpaid.

★**SHENANDOAH** (4 ft.)—An abundant bloomer with waxy rose pink flowers and rich dark foliage, highly ornamental. Price 10c. each; \$1.00 per doz., postpaid; \$7.00 per 100 by express.

★**DAVID HARUM** (3 ft.)—Flowers of bright vermilion scarlet mottled with deep red. Price, 20c. each, ppd.

36 BEST CANNAS FOR MAKING BEDS

This list of cannas offers an excellent opportunity for making showy flower beds of continuous bloom of almost any size and color combination desired. Remember that tall kinds should be placed in the rear or centre of your bed with dwarf ones always outside, and perhaps the most effective show of all can be produced by planting an entire bed with simply one variety. The solid colors are best for such use.

"For glaring, gorgeous color and for profusion of bloom there is nothing to equal the Canna."—Extract from *The Garden Magazine*, August, 1907.

How to Plant and Grow

Up till May 1st, we send out our Cannas in Dormant Roots, except the new kinds which we offer only in potted plants. After May 1st, we aim to have all kinds ready in potted plants. Price, 5c. each more than Dormant Roots. Dormant Canna Roots may be started indoors during March or April, but should not be set out until weather is settled and the ground warm, usually May or June, in this latitude. When planting Dormant Roots do not set too deep. The eye should show a little through the ground when done. Plant in good rich garden soil mixed with ½ of old rotted stable manure. Set them about 18 inches apart each way. Water sparingly the first two weeks after planting, when growing freely water liberally. It will make them bloom more. In the late Autumn when killed down by frost, cut off the tops, lift the roots, leaving the earth on, and store in a cool root-cellar. Toward Spring, when they show signs of starting, keep back as much as possible until the weather is settled and ground warm. When ready to plant, divide carefully and cut the roots up like potatoes, taking care to leave only two or three eyes to a root, and then proceed to plant again as shown above.

LAYING OUT CIRCULAR BEDS

Always use tallest growing varieties in the centre, and then carefully grading each succeeding circle, using dwarf kinds for the outside, just as provided for in beds on page 58. Plant one canna in centre of bed, next six cannas 18 in. apart in a circular row 18 in. from centre. For each succeeding circle use six more cannas than were used in the previous circle and make it 18 in. farther away from the centre. A bed thus planted will contain 1 canna in centre, 6 in first circle, 12 in second circle, 18 in third circle, 24 in fourth circle, etc., and all 18 inches apart.

Cost of circular Canna Beds. If you will leave selection entirely to us, we will choose suitable kinds, and send you the right color and proper number for every circle of your bed, as follows:

HARDY ORNAMENTAL SHRUBS

WHETHER you have a lawn of many acres, or an humble door yard, we commend this class of plants as indispensable to the real beauty of your home. If you select with care, you can have a succession of bloom from April to snow, to say nothing of the beautiful color, form and shadow effects of flowers, foliage and bright berries. For planting along border lines, filling in or rounding off angles or for screens to hide fences or other unsightly objects, you will find nothing more permanently pleasing than varieties listed below. They may be planted with equal success, either individually or in groups. (Arrange the low kinds in front.) Prepare the ground and maintain it as if for a crop of potatoes. Plant in the Fall or Spring about 4 ft. apart and mulch with straw or leaves. *The time of bloom and height at maturity will be found under each item.*

ORNAMENTAL HEDGES

Beautiful Hedges add so much to the appearance of a property, and are, everywhere, coming into more general use. They look better than fences, last longer and cost less; when once established, they require only a little cultivation and pruning each year to keep them the desired shape and size. A fence is more trouble, a hedge grows better-looking every year. (These plants are also used for individual lawn specimens).

JAPAN BARBERRY (*Berberis Thunbergii*)

Of all the deciduous shrubs we know, we believe this is the most valuable for making a *low dwarf* hedge. It is of low, regular and compact growth and requires very little pruning. It has fine thorns and small round rich green leaves that change color in the Autumn to a fiery crimson. The hedge is made still more beautiful by great numbers of pretty drooping yellow flowers which are followed by bright red berries. It is frequently planted singly, and is one of the handsomest flowering shrubs we have. Our stock is the real, rare kind, and remarkably fine in every way. It is made from cuttings and not seedlings. Plant about 12 inches apart. (See illustration, Barberry Hedge, page 40.)

Beautiful Hardy Climbing Vines

Flower lovers and gardeners know how indispensable are vines and climbers for beautifying one's place, especially near the house. Plant Clematis, Climbing Roses and Honeysuckles about the front porches with perhaps a vine or two of the Chinese Wistaria to climb as high as the roof. Stone or brick walls are always prettier when ivy clad. Then going around to the rear of the house if you have a trellis to cover, or want a screen for certain buildings, get more Honeysuckles, and if you need something to cover a large space quickly, try the Kudzu vine; the Trumpet Creeper also is good. On the next four pages are the best climbers for arbors, arches, trellises, porches, etc. Remember how pretty an arbor can be. American Ivy or even Grape Vines make a good covering.

HARDY ENGLISH or LARGE FLOWERED CLEMATIS

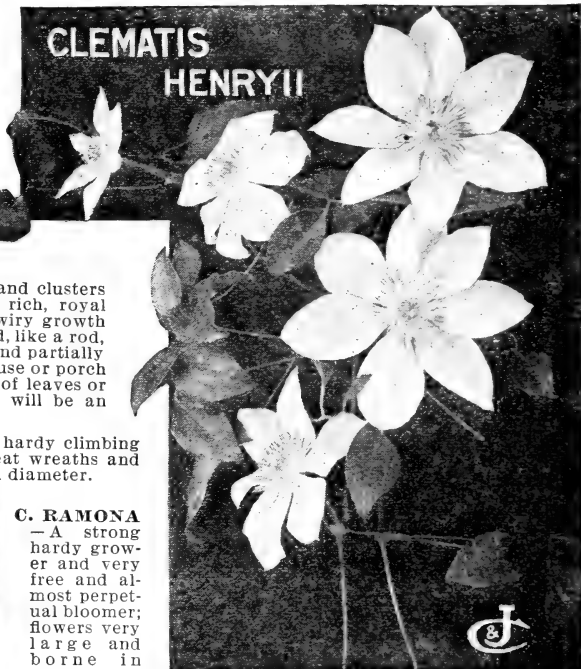

Note—The Large Flowered or Hardy English Clematis are considered the most beautiful of all our flowering vines. The flowers are large, often measuring four to six inches across and are borne in great wreaths and clusters during July and August. The colors range from rich, royal purple to pearly white. The vines are of slender, wiry growth and require some support that they can twine around, like a rod, pole or wire, and if the location is somewhat moist and partially shaded, so much the better; the north side of the house or porch is often the best place for them; hardy, but a mulch of leaves or litter around the roots at least the first season, will be an advantage.

CLEMATIS JACKMANII—A rare and beautiful hardy climbing vine of slender twining growth and bearing great wreaths and clusters of splendid purple flowers; 5 to 6 inches in diameter.

HARDY PERENNIAL PLANTS

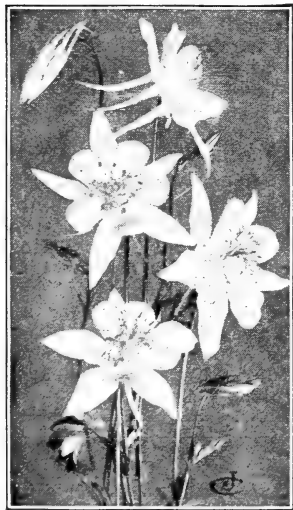

or OLD-FASHIONED GARDEN FLOWERS

One of the Chief Delights that comes from owning a garden is in having flowers enough to give one's friends, as well as for house and table decoration. The beauty, variety and lasting qualities of Hardy Perennials make them especially useful as cut flowers. They are also equally valuable for adding brightness and color to the border beds, and a comparatively small collection will enable you to have some flowers in bloom all Summer through. They require almost no care at all, are perfectly hardy, and last for years, which makes the first cost about the only expense. Thus as a class, they combine beauty, utility, and economy in a rare degree.

DIRECTIONS: We send you most of these in roots. Plant in the early Spring or Fall, allowing from 1½ to 4 square feet of space for each (depending upon the size and character of the plant), unless otherwise noted. They will do well in any soil that will grow garden vegetables; it should be reasonably rich and spaded to a depth of 2 feet, to allow of good root growth. Keep down the weeds, and if you find any plants inclined to sprawl, put in a stake for support. After the first severe frost in the Fall, cut down the tops to within 3 inches of the ground, and give the bed a good coat of half rotted manure (this will both protect the plants and enrich the ground); dig this under in the Spring, before new growth starts.

PRICES UNLESS OTHERWISE NOTED: 15c. each, 2 for 25c., or 12 for \$1.10, postpaid. 25 for \$2.00, and \$7.50 per 100, by express.

SPLENDID DOUBLE HERBACEOUS PAEONIES

"ARISTOCRAT OF THE FLOWERS"

The Paeony was a grand old flower in our Grandmothers' gardens, but wonderful advances in size, coloring and fragrance have been made in recent years. Modern Paeonies such as here offered have, by their wonderful beauty aroused a veritable wave of enthusiasm. There is something of true magnificence about this aristocrat of the flowers, and in large mass plantings they produce an effect that you remember—great, gorgeous blossoms, daintily dyed with the most exquisite shades, from white to the deepest reds. They are deliciously fragrant and for effective decorations, especially on a large scale, are totally unsurpassed. Bloom several weeks in the Spring. Height, 2 to 3 feet.

Culture.—They will grow anywhere, reasonably speaking—tho' they do best in rich, deep soil and a sunny position they thrive equally well in partial shade. Plenty of water during the growing season is an added stimulus. They are perfectly hardy, require no protection and are not troubled with insects or disease—in short, they will care for themselves, increasing in beauty, size and profusion of bloom each succeeding year.

Hardy Perennial Phlox

Hardy Perennial Phlox

The Improved Varieties of Hardy Perennial Phlox, which we offer below, are among the handsomest and most useful of our hardy herbaceous plants. The flowers are very large, and borne in grand massive heads of most brilliant colors. The plants are perfectly hardy, and when established will bloom on year after year, with little or no attention. There are few plants that with so little care will make such a handsome display of brilliant colored flowers every season. To obtain best results, the soil for them should be deeply dug and have incorporated into it some well decayed manure. They will be better if given water during a dry spell and a mulch of manure for the Winter.

Etna—A remarkably brilliant variety; flowers are bright orange red suffused with fiery red and a cherry red eye—dazzling. Price, 25c. each, ppd.

Also 16 Other STRONG HARDY EVER-BLOOMING Roses

Gold Medal Rose — "Maddalena Scalarandis"

This is the famous Gold Medal Rose which attracted so much attention in our Grand Prize Rose Exhibit at the St. Louis World's Fair, and we again ask special attention to it; both buds and flowers are extra large and exceedingly beautiful, and its productiveness is truly astonishing, the whole bud being a perfect blaze of bloom for weeks and months; color, dark rich rose on deep creamy ground elegantly flamed with scarlet and crimson.

DOROTHY PERKINS—This is a grand new variety, so hardy as to withstand the most severe winters with impunity. Grows 10 to 15 feet in a season. Flowers are perfectly double with petals crinkled and color a clear shell-pink. They are borne in immense clusters that cover the bush for several weeks in the Spring (see cut, page 40, in Catalog). Blooms just in time for June weddings, and because of its abundance of bloom is a most valuable rose for cutting and decorating.

The other 16 Strong, Hardy Ever-Blooming Roses will be selected from our regular stock of sturdy, healthy plants; Roses that have been thoroughly tested and found to be hardy (with protection) in this climate; of good form, good color, and in every way satisfactory. We will choose same as we would for ourselves and make you up a nice assortment, including all the finest colors, such as red, white, pink, etc. There will be no two Roses alike, but each one will be separately labeled and all carefully packed, and guaranteed to reach you in good growing condition.

SPECIAL OFFER No. 200 the entire 18 above Roses \$1.00 post-paid.

WHAT OTHERS SAY

THE CONARD & JONES CO., West Grove, Pa. Gentlemen:

To-day the men are protecting the Roses for Winter, which reminds me that I have never written to express my pleasure and satisfaction with the size and quality of the Roses ordered from you. They were unquestionably the strongest and best plants that I have ever received. They soon began to show abundant life, and many of them had fine blossoms in June. "Dorothy Perkins" climbed up to a second story window, and all have made wonderful growth, showing remarkable vigor and constitution. Very truly yours,

H. A. H.—, N. Y.

Richmond, Va., Oct. 24, 1907.
THE CONARD & JONES COMPANY, Gentlemen:

My Roses have been so exquisitely beautiful that I must write you about them. You remember they were one year plants and I must confess that I expected very few blossoms, but they have bloomed from the 21st of June and are yet blooming. ***

Mrs. M. E. K.—

No. 50416.
Shullsburg, Wisconsin, Nov. 8, 1907.

CANNA "UNCLE SAM" New 1908

Received Award of Merit, Summer of 1907, from The Royal Horticultural Society of England.

"Uncle Sam" is a strong growing, tall, orchid-flowering Canna that is bound to attract attention wherever planted. It is a clean vigorous grower with an abundance of rich green foliage, and each leaf edged with a narrow purple band. It is very stately in appearance, with erect heads and bears enormous bunches of huge flowers; color is a brilliant orange scarlet, lighter than Louisiana. Flowers are very large with rounded, wavy edged petals. The bloom heads are wonderfully compact and yet held so erect that a row of these plants are a magnificent show. This variety will stand more cold than any ordinary Canna we know and keeps its color splendidly till the flowers drop off. Height 6 to 7 ft. Price, when purchased singly, good strong plants 50c. each, ppd.

Grand Japanese Fern Balls

These pretty Japanese Fern Balls are made in Japan from a special variety of mountain fern roots and moss, and are so constructed as to send out beautiful emerald green fronds from every point until covered all over, as shown in the illustration and are beyond question the most unique and beautiful of all decorative plants. They are easier grown than a palm, and more beautiful; require no potting or soil; any one can grow them successfully.

DIRECTIONS FOR STARTING—Soak the ball in tepid water for a half hour, then hang up, repeat every other day until growth is started, after which sprinkle occasionally as required. It needs practically nothing except the proper temperature which is that of an ordinary living room, and sufficient water to keep it in proper condition; it may be allowed to dry up at any time when desired, set away and started up again by watering as before.

PRICES—7 to 9 inches in diameter, one year, 65c. each, 2 for \$1.00, postpaid.

5 inches and up, one year, 40c. each, 2 for 75c., postpaid.

EARN MONEY BY GROWING CUT FLOWERS

The last census of the United States showed an increase of 1000 per cent. during the past 25 years in Commercial Floriculture. The largest part of this business is devoted to growing cut flowers—the demand for them is enormous. We believe anyone who can grow beautiful flowers in sufficient quantities will find ready sale for them at a good price.

The greatest demand for them, of course, is in our larger cities. Carnations, Roses and Chrysanthemums are the most popular.

We do not grow cut flowers but we furnish a great many plants to people who do, and our plants are among the best to be had for that purpose. We shall be glad to quote special prices by the 100 or 1000 to anyone who would like to grow the flowers for sale, whether in large or small quantities.

FLOWER SEED DEPARTMENT

The Conard & Jones Co., West Grove, Pa.

We make a special business of flower seeds, and gather them from all parts of the world, wherever the different varieties reach greatest perfection. We import many kinds from Europe, others from Japan, and a large number are grown in California, where both the climate and soil are especially favorable for flower culture. We always get the best that are grown and assure our friends that no finer flower seeds can be had anywhere.

Our C. & J. Surpassing Flower Seeds are our own special brand of the very best quality, carefully selected and sure to give the greatest satisfaction. Nearly all the finest gardens you see are made with flowers grown from seed, and you doubtless know that a dollar's worth of our surpassing flower seeds will produce many times as many beautiful flowers as the same amount spent in plants.

Premiums on Flower Seeds in Packets

Our prices are low, but we wish to be as liberal as possible, and persons sending 50 cents or more for seeds in packets or ounces, may select to the value of 10 cents extra. Dollar orders 20 cents extra, and larger orders in same proportion, but no premiums can be allowed on seeds ordered by the ¼ lb. or upwards, or on lawn grass, or any special collection of seeds, and these cannot be given as premiums.

For the convenience of our customers we have adopted a new and improved classification for Flower Seeds, as follows:

Annuals and Flowers that bloom the first year,	pages 98 to 113
Biennials and Perennials,	" 119
Annual Climbers,	" 114 to 117
House Plants,	" 118

Alyssum (LITTLE GEM)—Undoubtedly the finest strain of Alyssum grown. Very easily cultivated. Grows only three to four inches high, and each plant will often completely cover a circular space of fifteen or twenty inches in diameter; a perfect mass of white flowers that last the entire Summer. Pkt., 6c; ½ oz., 20c; oz., 35

Hints on Growing Flowers from Seeds

Always buy C. & J. Surpassing Flower Seeds; there are no better to be had, and they will make a grand display of beautiful flowers the whole growing season.

Any ordinary soil will grow beautiful flowers if you make it fine and mellow, and plant about the time the fruit trees are coming in bloom. Keep clear of weeds, and nature will do the rest.

Do not plant when ground is wet and soggy, or it may bake so hard as to prevent the little plants from coming through.

Do not cover too deeply; very fine seeds should be merely pressed in with the hand. Or if covered at all use very fine sifted soil put on evenly of uniform depth.

Do not allow plants to stand too thickly; weed out or transplant if necessary. If crowded they cannot grow or bloom satisfactorily. A home adorned with beautiful flowers is sure to be happy and prosperous.

Transplanting

Nearly all flowers are improved by transplanting except sweet peas, poppies, nasturtium, etc., which are usually sown where they are to grow. By starting tender seeds in window boxes, hot beds, or cold frames, and transplanting at proper time when ready, you escape danger from frost and secure the earliest and finest flowers.

Alyssum (SWEET)—This is one of those almost indispensable plants that bloom throughout the Summer. Grows to only four or five inches high and therefore is excellent for edging or bordering flower beds; altogether a most satisfactory little annual. Pkt., 5c; ½ oz., 25c.

Headquarters for Canna Seeds

"The greatest breeder of new American Cannas is Mr. Antoine Wintzer, who has raised nearly 40,000 crosses."—From *Garden Magazine* for August, 1907.

Our splendid Ever-Blooming Pedigree Cannas grow easily from seeds, and bloom finely the same season—almost as quickly as rooted plants—and as they come much cheaper in this way, many people prefer to grow them for themselves.

When we say that our Canna Seeds are

"BEST IN THE WORLD,"

we mean exactly that. Our Vice-President, Antoine Wintzer, has won a national reputation as an originator and propagator of new Pedigree Cannas. His years of patient, skillful, persistent, cross-hybridizing has given us a wealth of new and rare varieties from which has been chosen the largest and most beautiful. For richness of color, size and durability, these Cannas far surpass the ordinary sorts and kinds you may have been accustomed to see. In short, this page offers you not only the largest assortment but unapproachably the finest Cannas to be had from any one, anywhere, and all at exceedingly small cost. (Be sure to see the chapter on Canna Plants on pages 52 to 59, and our beautiful color plate of Cannas on page 135.)

WORTH KNOWING

A thing you need to know about Canna seeds is that they have hard shells and are therefore very slow to germinate unless you take the precaution to file or cut away this hard shell at the germ end.

With small hard seeds this is difficult, therefore, for the convenience of our customers we have already prepared in this way all the seeds offered on this page.

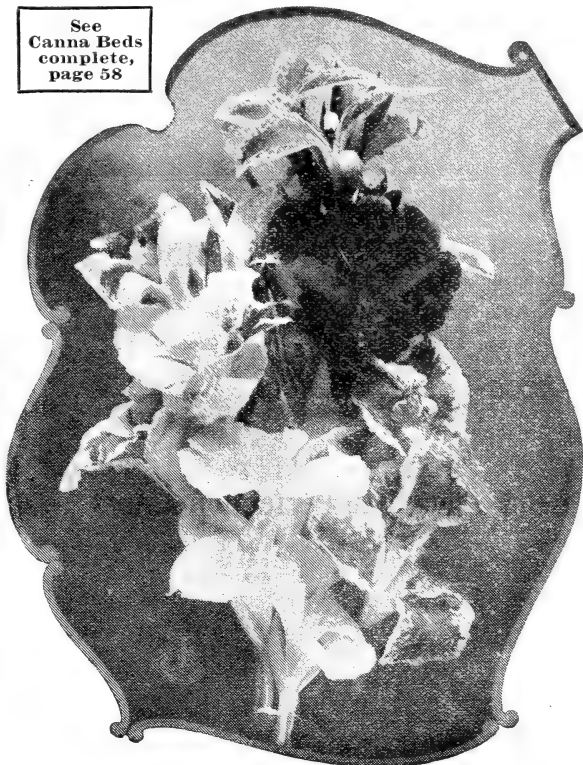

When ready to plant, soak seeds in warm water for half a day or more, and then plant indoors, about one inch deep, and you should get about sixty per cent. to germinate. Transplant to eighteen inches apart soon as ground is warm.

C. & J. Velvet Green Lawn Grass Seed

The best brand for seeding down new lawns and renovating old ones.

Our Velvet Green Lawn Grass Seed is not excelled by any for producing a smooth, even, velvety-green sward that will withstand drought and hard usage, and always make a handsome appearance. In seeding down a lawn or grass plot, three things are necessary to insure success: First, to prepare the ground so as to have a fine, smooth seedbed; second, to put on plenty of seed; never less, but rather more than the directions call for; third, to start the lawn-mower as soon as the weeds (which are always in the ground and sure to start first) are tall enough to catch the machine, and keep them mowed off close till the grass has time to start and become well established. The seed should be lightly raked in and finished with a roller. Apply any good commercial fertilizer as a top-dressing when needed. One quart of seed is enough for three hundred square feet (fifteen by twenty feet), or at the rate of five bushels to the acre. Lawns should be kept neatly mowed, which induces a clean, even growth of fresh lively green.

Price by mail, postpaid, 25c. per quart; two quarts for 45c.; in bulk, purchaser paying express charges, \$1.25 per peck, \$4.00 per bushel of 20 lbs.

Tuberous Rooted Begonias—Half Natural Size

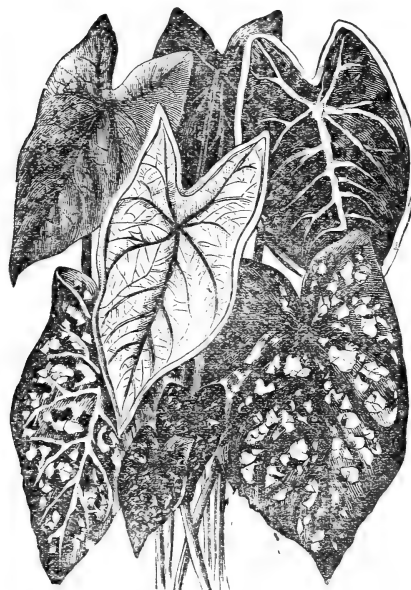

Tuberous Rooted BEGONIAS

Our new Tuberous Rooted Begonias are among the most beautiful of all Summer flowering bulbs. They grow twelve to fifteen inches high, branching freely and blooming abundantly all Summer and Fall. The flowers are exceedingly rich and handsome, from four to six inches across; many brilliant colors, including red, pink, crimson, scarlet, salmon, yellow and pure white. The bulbs should be started early, in the house, and set out when ground is warm; they like rich, moist ground when convenient, but will do well in all usual places if mulched with old, well-rotted manure or some similar material to shade the ground and prevent it from getting too hot and dry. The bulbs will last for years, the flowers increasing in size with each succeeding season.

GROFF'S NEW HYBRID GLADIOLUS

This new strain is one of unusual merit and has a history of more than passing interest. Mr. Groff, a Canadian banker, gathered from various parts of the world perhaps the finest collection of Gladiolus ever gotten together. Some were very expensive. By careful selection and cross-breeding extending over a period of fifteen years, he obtained this "Groff strain of Hybrid Gladiolus," which for size of flowers, form and exquisite coloring are absolutely unsurpassed. They embrace all imaginable shades of reds and yellows, pinks and creams—of remarkable brilliancy—striped, stained, dotted, blotched, watered or feathered; even rare blues, lilacs and lavenders, to be found in no other strains.

Mr. Groff does not allow a diseased plant on his place; nor does he name new kinds. Therefore, whoever orders from this stock has a treat of surprises in store.

Price, 5c., each; 3 for 12c.; 12 for 40c.; \$3.00 per 100, postpaid; or, \$2.50 per 100, by express.

Choice New Garden Fruits

Every person who has a garden needs some of our Choice New Garden Fruits, they take very little room, come into bearing quickly, and will repay their trifling cost many times over in delicious fruit, besides the pleasure and satisfaction of having them of your own. The varieties offered below are the very finest sorts, and it will pay you to give them a liberal trial this year.

Dwarf Bismarck Apple

We take pleasure in recommending this wonderful New Dwarf Apple for planting in gardens and yards where fine fruit is desired, but not room for large trees. It has been thoroughly tested and proved to be a most valuable variety. Remarkable for its dwarf growth and early and abundant bearing. Little trees, not much over three feet high, frequently bear large apples the first season after planting, and all should bear abundantly in a very short time. The apples are large and beautiful: rich golden yellow, streaked with red. They ripen about mid-season and are of most delicious quality. The trees may be planted along a fence or in any vacant corner you happen to have, and will soon repay you with delicious fruit.

Prices Nice one-year trees, 25c. each; 3 for 65c.; \$2.25 per doz., postpaid. Two-year trees, 35c. each; 3 for 90c.; \$3.00 per doz., by express, at purchaser's expense.

SNYDER—Extremely hardy, and enormously productive; medium size, sweet and juicy, with no hard sour core. The leading variety where hardness is the consideration. Ripens early. Valuable for both home use and market.

WARD—A New Jersey wonder. This is a decided improvement over existing varieties. A strong healthy grower with fine healthy canes and perfectly hardy. It is an exceedingly prolific variety with fruit quite black, large and solid and it has never suffered from Winter injury in this latitude.

SELECTED STRAWBERRIES

NOTE—When Setting Out Strawberry Plants be careful not to let the roots get dry. It is a good plan to dip the roots in water, taking care not to wet the crowns, and then "heel in" in moist shady ground until you are ready to plant. Press the earth down firmly on the roots, so as to exclude the air and hot drying winds. This is important.

New Home—A splendid new bright red berry of uniformly large size. Without exception the best keeping and shipping berry known. Produces a very large crop and invariably brings a high price in the market. Price, 30c. per doz.; \$1.25 per 100, postpaid.

Two Charming Roses

AS SHOWN IN COLORS ON BACK COVER PAGE

KILLARNEY (Imperial Pink)

This splendid new Irish Hybrid Tea Rose is a strong, vigorous grower, a very free bloomer and perfectly hardy, having stood out here during the past two Winters without protection. The large size of the flowers and substance of petals are remarkable. (See illustration from photo, page 14.) The color is exquisite, a brilliant imperial pink, almost sparkling, and beautiful beyond description. We have a splendid stock to offer this year and all on their own roots. Price, 25c. each; \$2.50 per doz.; larger size, 30c., postpaid. Two-year size, 50c.; \$5.00 per doz. Extra size, 75c.; \$7.50 per doz., by express.

IT IS BECOMING QUITE CUSTOMARY, especially on large places, to plant rose beds entirely of one variety. Few roses could be found better for this purpose than Killarney and Magnafrano. 12 roses will fill a bed 3 feet wide by 8 feet long. Have you room for a dozen of each?

MAGNAFRANO (Rich Red)

Or, the Ever-Blooming General Jacqueminot

Magnafrano is the result of a cross between "Magna Charta" and "Safrano." It combines the hardiness and vigor of the Magna Charta with the free-blooming habit and delightful fragrance of the Tea Roses. The flowers are extra large, frequently 4 to 5 inches across, very regular, full, double and deliciously sweet. The color is a deep, rich, brilliant crimson. The bush is a strong, upright grower and a constant and most abundant bloomer. Price, 20c. each; 3 for 50c.; 7 for \$1.00; 15 for \$2.00, ppd. Two-year size, 40c.; 3 for \$1.00; 7 for \$2.00; 15 for \$4.00, by express, at purchaser's expense.

Our Search=Light Canna Set

FIVE AS SHOWN IN COLORS ON OPPOSITE PAGE

It is impossible to exaggerate the brilliancy and almost blazing glory of colors in these Cannas. The finest artists and the best color printers in the country admit that they cannot do more than imitate the richness of their gorgeous shades, but the illustration opposite will convey some idea of the splendid variety and combination of colors that may be obtained from our large size C. & J. Canna Lilies (shown here in only one-half natural size).

C. & J. Pedigree Cannas are so much larger and finer than the ordinary kinds that when people try ours once they are almost sure to want more. Roots increase rapidly.

All on these two pages were originated by the greatest of American Canna Hybridizers, our Vice-President, Antoine Wintzer, and introduced by ourselves. See further information, page 52.

1. ★Martha Washington (3 FEET)—The flowers are extra large, often measuring over five inches across. Color, clear, bright rose pink, exceedingly grand and beautiful. It is a healthy vigorous grower and prodigious bloomer. For a lovely bed of pink flowers on your lawn all Summer you'll find nothing so altogether pleasing. Splendid for a canna bed. See page 59. Dormant roots. Price, 15c. each; 12 for \$1.50, postpaid; \$10.00 per hundred, by express.

2. Coronet We are often amazed at the strong demand upon us for good yellow Canna lilies. Aside from Buttercup we consider Coronet one of the best solid yellow cannas on the market. Flowers are pure bright yellow and uniformly good green foliage, usually three feet high. Dormant roots. Price, 15c. each; 12 for \$1.50, postpaid.

3. Canna Meteor (NEW)
One of our choice new kinds. Meteor is a vigorous grower with healthy green foliage, height nearly five feet. It is highly valued because of its magnificent flowers, fully four inches across, and abundance of bloom. Color is a deep crimson, very rich; each plant usually

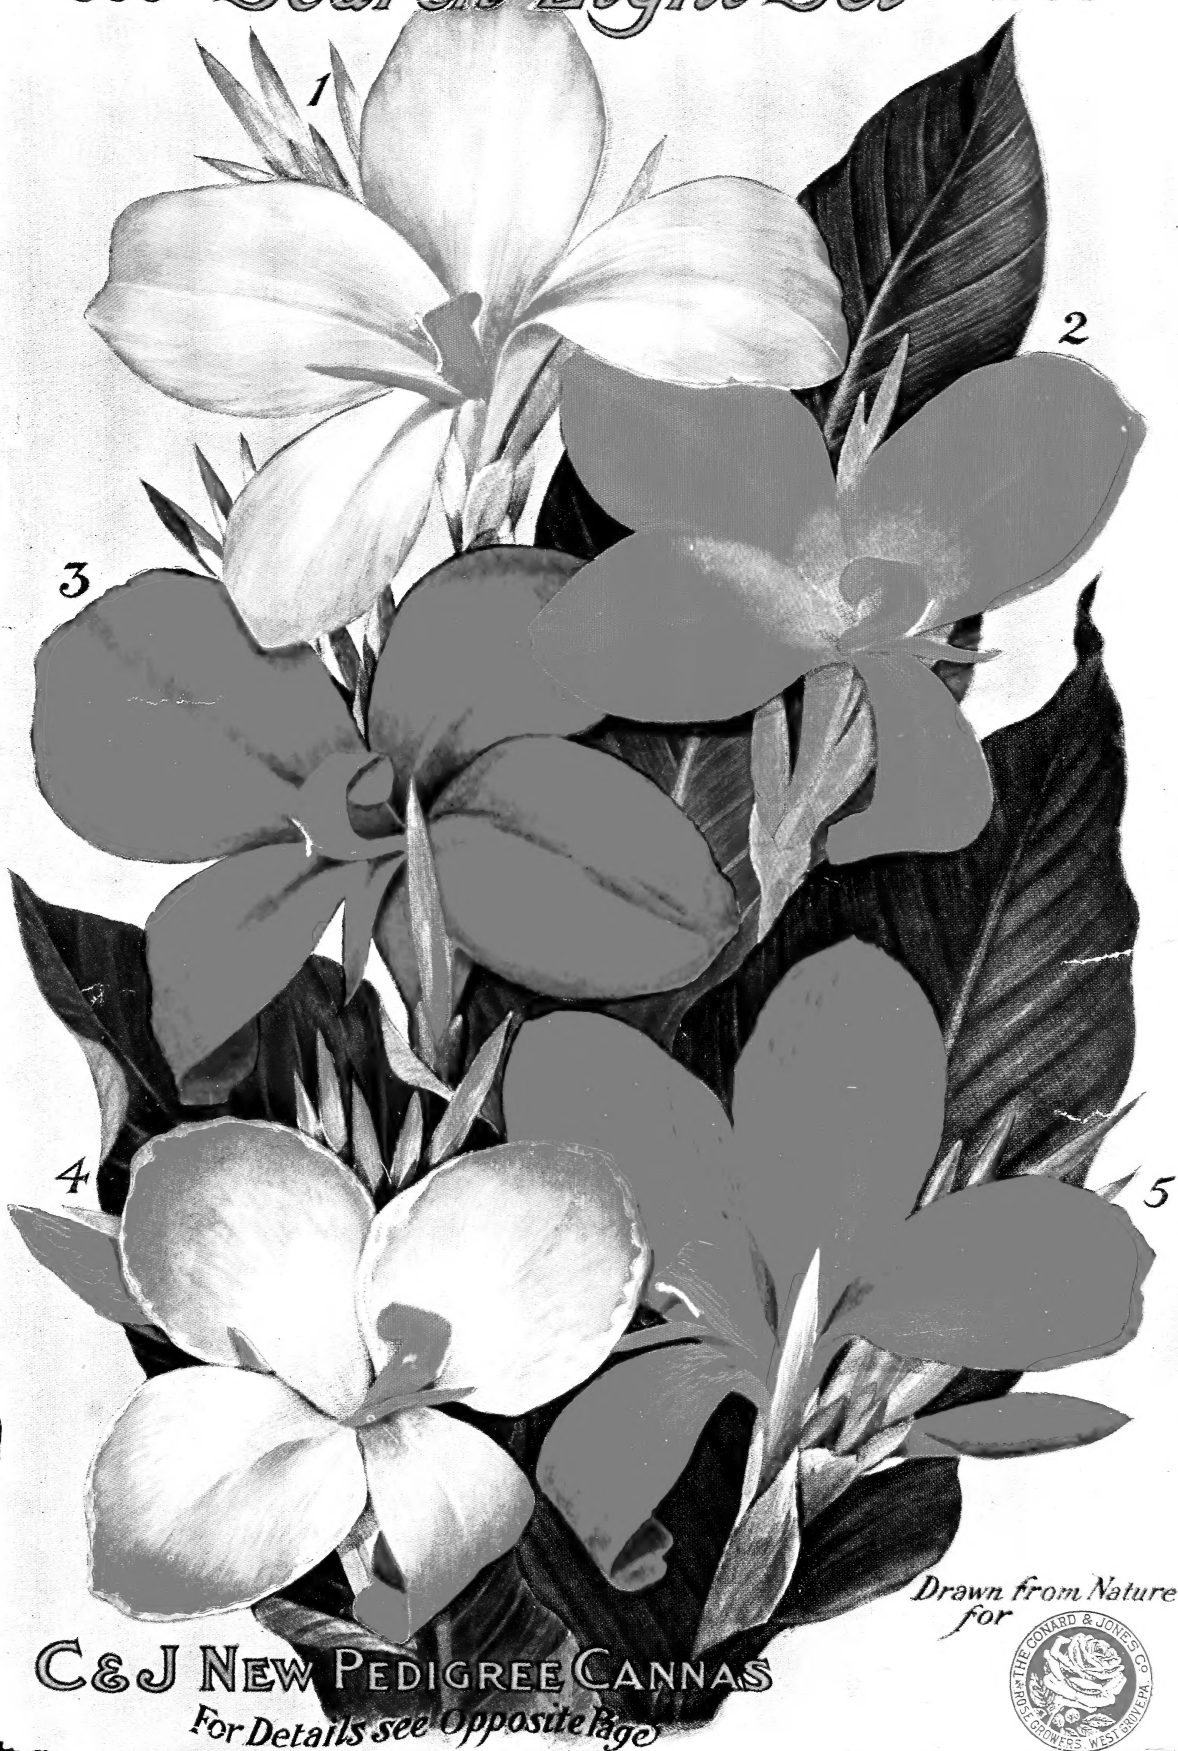

throws up five to six trusses of buds which continue blooming luxuriantly all Summer through. Price if bought separately, plants or dormant roots, \$1.00 each, postpaid; 6 for \$5.00, delivered.

4. Venus (4 feet, C. & J., 1906)—Venus is a great favorite with visitors here, just as it was at the St. Louis World's Fair in 1904, where it was exhibited among our famous unnamed seedlings. The color is a gay rosy pink with a mottled border of creamy yellow. It blooms splendidly with heads erect and flowers bright, because the old ones drop off as fast as the new ones come. Has a good constitution; green foliage. This is one of the cannas that seems to please every one who sees it. Dormant roots. Price, 30c. each, postpaid.

5. Brandywine (3½ feet)—Men who make gardening their business often come to see our cannas, and we believe if we took a vote among them they would choose Brandywine as the best of the bronze-leaved kinds. It is so thoroughly handsome all season through. It has a luxurious growth of very dark foliage and is heavily topped with a magnificent display of brilliant red flowers. Dormant roots. Price, 20c. each; \$2.00 per doz., postpaid; \$14.00 per 100, by express.

To introduce still more widely in every community our Improved New C. & J. Pedigree Cannas we offer to furnish the entire set of above cannas for the price of one, as follows:

SPECIAL OFFER No. 201—All 5 above Cannas, started plants for \$1.00, postpaid or until April 15, same 5 in dormant roots for 75c., postpaid.
